## EXCELLENCE, THROUGH INNOVATION AND ORIGIN

**X-CUT**  
Advanced optical measurement and high-precision manufacturing deliver premium cuts characterized by unmatched brilliance.

**HOTFIX GLUE**  
The variable temperatures at which Hotfix glue can be activated enable the application of crystals on a broad range of textiles.

**PLATINUM PRO**  
With its new advanced foiling technique, Swarovski has set a new standard in the lifespan of crystals.

**CRYSTALS - MADE IN AUSTRIA**  
The combination of innovation with sustainability and respect for individual wellbeing means that quality is always assured.

## PREMIUM, BY SERVICE AND DESIGN

**DESIGN SERVICE**  
Throughout its global network of Design Centers, Swarovski offers exceptional service provided by the industry's best creative talent.

**GLOBAL SERVICE**  
Swarovski's Global Service Network provides customers with dedicated personal assistance on a local level.

**APPLICATION SERVICE**  
A comprehensive range of application services means customers benefit from the extensive experience of leading international experts, as well as internal specialists.

**DESIGNER EDITIONS**  
Creative collaborations with top designers result in exclusive cuts and unique designs for Swarovski crystal.

## COMPLIANCE, WITH INTEGRITY

**ADVANCED CRYSTAL**  
Swarovski's patented lead-free\* formula has changed the DNA of crystal while still offering the same sparkle, dependability, and variety for which Swarovski is famous.

**CLEAR**  
Regular legal monitoring of chemical requirements and reasonable testing provide customers with the comfort of trust in Swarovski's products.

\*Crystal glass and all other materials containing 0.009% lead or less.

**OEKO-TEX**  
Oeko-Tex® Standard 100 Class II (direct contact with skin) certification creates confidence in chemical safety of textile applications.

## Seal your success

# Product Overview

---

## PASTEL STORY

Strong increase in market demand for powder effects. Pastels retain prominence in international design directions for SS16, with a softer, opaque hue offering a new take on the classic pastel. Swarovski's new pastel colors offer subtle elegance with a hint of nostalgia in a modern interpretation.

Reflecting the strong trend direction of soft pop and nostalgic design directions. Sugary sweet with a modern update in the form of a powder finish - perfect for retro styles or combined with pure crystal brilliance to highlight the trend toward matt and shine in modern design directions.

---

## CRYSTAL LACQUER<sup>PRO</sup> EFFECTS

A genuinely "delicious" color palette if there ever was one, the new Crystal Lacquer<sup>PRO</sup> Effects represent the strong new design direction of softer, opaque hues, while at the same time offering a more contemporary version of the classic pastel - and an entirely new coating in the Swarovski assortment! A new premium opaque varnish will be put on the reverse side of the crystal instead of foiling, resulting in a kind of opalescent look with soft nostalgic shades in a modern interpretation. There are currently five Crystal Lacquer<sup>PRO</sup> Effects, available on crystal in sizes PP 21 and above.

Crystal Powder Blue  
(001 L104)

Crystal Powder Green  
(001 L102)

Crystal Powder Grey  
(001 L105)

Crystal Powder Rose  
(001 L103)

Crystal Powder Yellow  
(001 L101)

---

## CRYSTAL PASTEL PEARLS

The new Crystal Pastel Pearl colors are truly elegant matt and powdery tones. We are launching a comprehensive family of five soft shades of rose, yellow, blue, green, and grey.

There must be a total lack of embellishment coating the colors. To look chic and sophisticated such feminine shades need to stand alone. Soft shades of powder pink, baby blue, mint green, and baby chic yellow should be integrated into streamline shapes or used as accents in clean designs.

Be spring-ready with pastels and go for soft, powdery designs!

Pastel colors mixed with brilliant gems are suited to almost every wardrobe.

Crystal Pastel Blue Pearl  
(001 966)

Crystal Pastel Green Pearl  
(001 967)

Crystal Pastel Grey Pearl  
(001 968)

# XERO

THE WORLD'S  
SMALLEST PRECISION-CUT  
CRYSTAL

# Round Stones

## 1100 XERO CHATON - THE WORLD'S SMALLEST PRECISION CUT CRYSTAL

Swarovski has achieved what until now seemed impossible: with the new **XERO Chaton** the innovation leader has created the world's smallest precision-cut 8-facet stone of this class – naturally made according to the Advanced Crystal standard. The Art. 1100 is now available in sizes PP 0 and PP 1, and opens up possibilities for creating designs in a whole new dimension, while still offering designers the assurance of color consistency throughout the entire range of sizes.

### Available Chaton cuts

As of now, Chatons in the assortment are available starting with size PPO (0.7 – 0.8 mm) and ranging up to 50 mm. Depending on the size, Swarovski offers Art. 1100 XERO Chaton, art. 1028 XILION Chaton or art. 1088 XIRIUS Chaton.

For further information regarding the XERO Chaton please visit: [SWAROVSKI.COM/PROFESSIONAL](http://SWAROVSKI.COM/PROFESSIONAL)

Size 3, 4 mm

4428 XILION Square Fancy Stone

Size 6, 8 mm

A large grey square with the number '4428' in the center. To its right is a vertical bar labeled 'Size' with five options: 2 mm, 3 mm, 4 mm, 6 mm, and 8 mm. Below the grey square are two horizontal bars: a black one labeled 'Crystal Effects' and a grey one labeled 'Metallic Effects'. At the bottom, a yellow circle icon is followed by the text 'Crystal Metallic Sunshine F. (001 METSH)' and a 'NEW!' label. Five small black squares are positioned below the size options, each connected to a vertical line from the size bar.

HALF HOLE PENDANTS

This launch SWAROVSKI presents a completely new pendant concept: the half hole pendants. We will offer two new shapes: the elegant pure drop pendant shape as well as the twisted drop pendant shape. It's up to the customer whether they buy the finished pendant with different metal pin shapes or just the crystal, which leaves a lot of space for customers' creativity in the creation of a customized metal part or the metal pin itself. Matching the classy shape, the color and effect assortment strongly represents the typical gemstones color range.

---

**APPLICATION ADVICE**
**Choice of Glue**

Two different types of adhesive can be used to affix the single Half Hole Pendant to the metal cap: UV glue and two-component epoxy resin glue.

If using UV glue, the crystal must be permeable to UV light. This applies for the following Half Hole Pendant colors and effects: Crystal, Crystal AB, and Amethyst. Best results in internal tests were achieved using the UV glue DELO-PHOTOBOND GB 368.

Please note that some crystal colors absorb UV light and are thus unsuitable for use with UV glues: Siam, Smoky Quartz, and Jet. In this case using epoxy resin glue is suggested. In internal tests, the best bond was achieved using CG 500-35.

As colors and effects not explicitly mentioned may provide variable results, in these cases it is recommended to perform application tests with UV glue or to choose the option of gluing with epoxy resin glue. For further information about commonly known and globally available glues and their adhesion on metal, please consult the Application Manual on our business website [SWAROVSKI.COM/PROFESSIONAL](http://SWAROVSKI.COM/PROFESSIONAL).

**Application**

1 To achieve precise and consistent results, it is suggested to use a dosage system. Choose a dispensing tip with a diameter smaller than 1 mm and put a dot of glue into the pendant's hole. The amount of glue used depends on the type of adhesive and its curing behavior; performing application tests is therefore recommended.

2 After setting the metal cap into the hole, the glue should be evenly distributed in the gluing gap and spread over the edges to also affix the metal part on top of the crystal. Remove excess glue before it is hardening, e.g. with a cotton wipe soaked in isopropyl alcohol.

**PAVÉ PENDANTS**

This launch Swarovski presents a completely new pendant concept: the **Pavé Pendants with Swarovski branding**

**The new Pavé Pendants family** is simply chic and radiates delicate charming sparkle for an easy, everyday style with a soft, feminine touch. It can be paired with other pavé pendants for an effortless, colorful, customized look or used as a single talisman. It constitutes a charming companion in jewelry pieces and makes a strong statement in elegant, glamorous accessories. Its multicolor finish makes it a charismatic eye-catcher that exudes positivity. Swarovski presents a new interpretation with an elegant, filigree pavé finish.

### APPLICATION ADVICE

The Fan/Moon Flat Back Hotfix can be easily applied using a standard heat press. The use of an ultrasonic device for single-stone setting is not possible. For articles smaller than 8 mm in diameter, the application parameters for Creation Stones apply. For bigger sizes, the application parameters are the same as those that apply to Creation Stones Plus. These items are not suitable for application from the front.

### CARE INSTRUCTIONS

The care instructions for the Fan/Moon Flat Back Hotfix are the same as those that apply to Creation Stones Plus from the Flat Back Hotfix assortment. For detailed information, please refer to the Application Manual on our business website [SWAROVSKI.COM/PROFESSIONAL](http://SWAROVSKI.COM/PROFESSIONAL).

NEW TRANSFER UNLIMITED TECHNOLOGY

Transfer Unlimited has sparked the inspiration of Jean Paul Gaultier.  
His captivating patterns were presented at his Haute Couture show in Paris.

**TRANSFERS UNLIMITED**

With **Transfers Unlimited**, Swarovski presents a spectacular new production technology that opens up an unprecedented range of motif designs. Up to 18 different elements – crystals, colors, sizes, and shapes – can be combined in one motif, doubling the design possibilities and offering stunning 3D surfaces, long rows, and even “floating” effects. With a tight compound that has reduced the distance between the elements to a minimum, **Transfers Unlimited** also offers the highest setting quality on the market.

The Flat Back assortment is the same as for our existing standard transfers.

---

**SPECIAL MOTIF SERVICE**

A special motif is any individual design created by the customer and different from the Transfers Unlimited Standard Collection. This service opens up many customization possibilities. There is also no need to set a motif by hand. You can rely on Swarovski's longstanding experience and design expertise and order a convenient, ready-to-apply design. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You may also submit sketches of a design to suit your personal requirements, such as a brand image or an image that complements a particular sales campaign or garment. This will then be made up according to your specifications using Computer Aided Design, which allows for easy adjustments tailored to your needs.

---

**CUSTOMIZATION POSSIBILITIES**

- Change elements of an existing motif
- Change size of an existing motif
- Logos or brand names
- Creation of pieces or rows
- Up to 18 elements possible per transfer motif
- max. motif size: 470x205 mm

---

**ORDERING PROCESS**

Send the request with a drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif refers to (transfers, Crystal-it, Crystal Mesh, etc.). You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

---

**IMPORTANT INFORMATION**

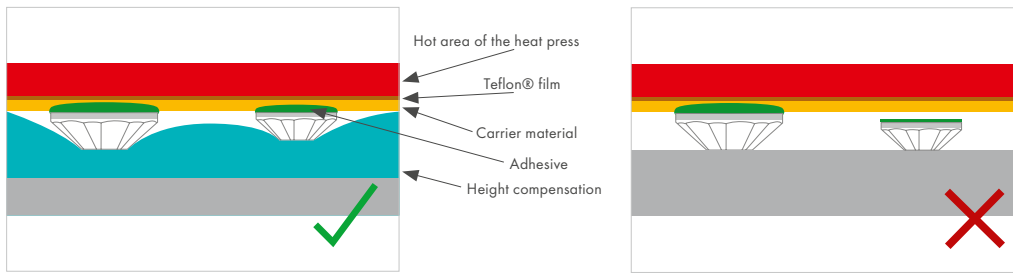

Please always submit your drawing of the desired motif in the actual size you require. When enlarged to the desired size, a small sketch will have blurred lines that will make it difficult to correctly reinterpret. Full-scale pictures or drawings or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via e-mail or on a CD-ROM. If the sketch is submitted as a hard copy by fax or e-mail, please include a scale legend (e.g. copy/scan with ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

Special productions are generally offered to all our customers if considered feasible and our General Terms and Conditions apply. Please note that simply ordering a design does not grant exclusive production of this design for the customer.

---

**APPLICATION ADVICE**

Transfers Unlimited can be applied using a standard heat press. The application parameters depend on the type of Transfers (e.g. Creation Transfers, Mezzo Transfers). Please be aware that some crystal combinations require an application from the back side and a compensating pad like silicone or rubber foam as height compensation.

Height compensation with different Hotfix elements

For detailed information about Transfer types and the corresponding Hotfix Selector, please refer to the Application Manual on our business website [SWAROVSKI.COM/PROFESSIONAL](http://SWAROVSKI.COM/PROFESSIONAL).

Please be aware that very small distances between crystals within one motif are not feasible for every crystal/size combination. Sometimes the gap between different types must be larger. To make sure your desired motif can be realized, contact your local Swarovski representative for further details.

---

**CARE INSTRUCTIONS**

The care instructions for Transfers Unlimited depend on the type of Transfer. Please refer to the Application Manual on our business website [SWAROVSKI.COM/PROFESSIONAL](http://SWAROVSKI.COM/PROFESSIONAL) for more information.

**APPLICATION ADVICE**

The Rivoli Square Crystal Button can be applied by hand or using a domestic or industrial sewing machine. When sewing this button, synthetic multifilament threads with a thread count of Nm 80 are most suitable due to their abrasion resistance. Monofilament and pure cotton yarns are not recommended due to their limited abrasion resistance. Please make sure that the transport system is deactivated to avoid any movement of the fabric. After selecting the over edge stitch, the length and width of the stitch must be adjusted to suit the element being applied. Due to the height of the article, using a program for sewing on buttons is not possible and it can only be applied without a standard presser foot.

**CARE INSTRUCTIONS**

The care instructions for the Rivoli Square Crystal Button are the same as those that apply to the Crystal Button assortment. For detailed information, please refer to the Application Manual on our business website [SWAROVSKI.COM/PROFESSIONAL](http://SWAROVSKI.COM/PROFESSIONAL).

## APPLICATION ADVICE

**Tools for fly press**

The Crystal Fabric Jeans Button can be applied by fly press, using existing tools for the Crystal Fine Rocks Jeans Button (art. 1795/140)/Chessboard Button (art. 1796/140):

	Art. 1797/140 
<b>UPPER DIE</b>	Art. 9060/009 
<b>SPARE PART FOR UPPER DIE (INSERT)</b>	Art. 9060/018 

<b>LOWER DIE</b>	Art. 9060/016 
<b>THREAD ADAPTER</b>	Art. 9060/014* 
<b>CHANGING PIN</b>	Art. 9060/015 

\* When using upper die art. 9060/009, please employ the specially developed thread adapter art. 9060/014.

**Application**

1 Place the top part of the Jeans Button in the upper die.

2 Place the arrow pin in the lower die.

3 Position the carrier material and apply. Regulate the offset/pressure using the adjustable stop.

**CARE INSTRUCTIONS**

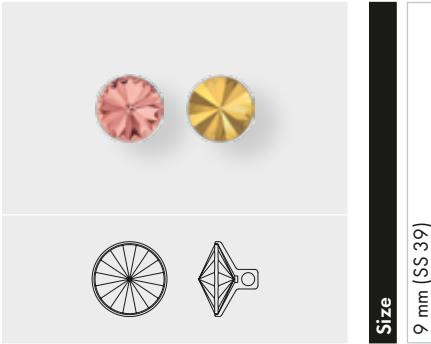

Care instructions for the Crystal Fabric Jeans Button are the same as those that apply to the Jeans Button assortment. For detailed information, please refer to the Application Manual on our business website [SWAROVSKI.COM/PROFESSIONAL](http://SWAROVSKI.COM/PROFESSIONAL).

**APPLICATION ADVICE**

No back part is necessary for the application of the Rivet Flat Shaft. The big advantage of this Rivet is the possibility of applying it with an automatic attaching machine.

If the Rivet Flat Shaft is applied with a fly press, use the following Swarovski tools:

<b>UPPER DIE</b>	Art. 9070/005 (M8) 
<b>SPARE PART FOR UPPER DIE (INSERT)</b>	Art. 9070/008 
<b>LOWER DIE</b>	Art. 9070/010* 

\*In this case the function of the lower die is the crimping of the Rivet shaft. No back part is used in this Rivet application!

Please note: Lower die (art. 9070/010) was updated in autumn 2014. The new version can be used for all Rivet applications the former tool version was used for. However, please consider that for new Rivets such as the Rivet Flat Shaft, only the optimized version of the tool can be used. If a lower die with article number 9070/010 was bought before October 2014 the tool must be replaced in order to apply the Rivet Flat Shaft successfully.

A vacuum pump and a specially developed vacuum adapter (art. 9040/023) enable easy intake and application of the Rivet Flat Shaft. Generally, it is recommended to apply this Rivet only on non-elastic fabrics like jeans or leather with a material thickness of 2 – 3.5 mm.

**CARE INSTRUCTIONS**

The care instructions for Flat Shaft Rivets are the same as those that apply to the Rivet assortment. For detailed information, please refer to the Application Manual on our business website [SWAROVSKI.COM/PROFESSIONAL](http://SWAROVSKI.COM/PROFESSIONAL).

**ARTICLE EXPLANATION**

The CG 610-240 two-component epoxy resin glue was specially developed for gluing Swarovski crystals of very small sizes, starting with PP 0. Depending on the area of application the adhesive can be used for crystals up to the size of PP 14.

**Key Features:**

- Suitable for gluing very small crystals (starting with size PP 0)
- Low viscosity allows an easier dosing of small glue quantities
- Cost saving due to long pot life (140 min.)

**Available Packaging Sizes**

The CG 610-240 adhesive is available in the following two packaging sizes and in two regional versions\*:

**CG 610-240 (A+B) 50 g cartridge**

(33.3 g resin + 16.7 g hardener)  
(Europe/America: art. 9030/101;  
Asia: art. 9030/301)

**CG 610-240 (A+B) 750 g box**

(500 g resin + 250 g hardener)  
(Europe/America: art. 9030/102;  
Asia: art. 9030/302)

\*Please note: The composition of the adhesive is the same for both versions; the different description on the packaging is due to local legal requirements. It is mandatory to order accordingly.

**Technical Data**

Mixing ratio (A : B)	2 : 1 (resin : hardener) by weight
Pot life at room temperature (23 °C/73.4 °F) – quantity applied: 1 g	140 min.
Complete curing time at room temperature (23 °C/73.4 °F)	72 h
Complete curing time in oven (40 °C/104 °F)	12 h
Complete curing time in oven (70 °C/158 °F)	4 h
Complete curing time in oven (100 °C/212 °F)	1.5 h
Handling time at room temperature (23 °C/73.4 °F)	16 h
Elasticity (break extension at 23 °C/73.4 °F)	46.5 %
Viscosity, mixed (23 °C/73.4 °F)	1.750 +/- 250 mPa*s

**Areas of Application**

The following table provides an overview of the glue's bonding on different materials:

MATERIAL	BONDING
Crystal	+
Glass	+
Ceramics	+
Stone	+
Aluminium	+
Brass	+
Silver	+
Steel	+
PC	+
PS	+
PVC/ABS	o
PMMA	o

**Bonding types**

- + sufficient or excellent bonding can be reached
- o sufficient bonding is possible
- sufficient bonding is nearly impossible

**Mixing CG 610-240 two-component glue**

The **50 g cartridge** of CG 610-240 is designed in a way that the containing resin and hardener do not have to be mixed together by the user. Just attach a dispensing gun and the dispensing tip (delivered with the 50 g adhesive package) to the cartridge and start gluing.

When using glue of the **750 g box**, resin and hardener have to be mixed. First, weigh the two glue components at a ratio of 2 : 1 (resin : hardener). It is very important to keep an exact mixing ratio of the two components to achieve maximum adhesion. Mix then the two components well for at least one minute. Only a fully homogenous mixture leads to the desired results.

When a homogenous mixture is achieved, put the glue into a dispenser/syringe and attach a dispensing tip.

---

**ARTICLE EXPLANATION**

This Chaton Sieve is the third of its kind offered by Swarovski. Providing a surface with small cavities, the sieve is an application aid perfectly matched to Swarovski's smallest Chatons (size PP 0 and PP 1). Light and handy, the sieve facilitates the application process by bringing the Chatons into the necessary starting position and is therefore the ideal choice for application techniques like gluing and working with Ceralun™.

**Key Features:**

- Allows easy handling of Chatons when arranging them for the application process
- Perfect aid for gluing and for working with Ceralun™
- The cavity size fits Swarovski's smallest Chatons (size PP 0 and PP 1)
- Light but solid material (polyurethane)

**Chaton Sieve** (art. 9030/003)  
for Chatons size **PP 0 – PP 1**

---

**APPLICATION ADVICE**

1 Before starting, make sure the surface is clean by polishing it with lukewarm soap water and a soft brush. Dust can be removed with oil-free compressed air. Place some crystals onto the sieve.

2 Slightly shake the application aid and wipe over the crystals; ideally wearing gloves. The majority of the Chatons will automatically fall into the suitable position for gluing or working with Ceralun™ (table pointing upwards).

3 As a next step, the Chatons can be easily picked up from the sieve using tools like a wax stick, tweezers, or vacuum pick-up systems. In this way, with its handy size the Chaton Sieve helps working with exceptionally small crystals much easier.

## **General Warning**

Loose crystals may present a small parts hazard to young children, particularly children under three years old. Depending on the size of the crystal and any attached material (such as glue, fabric, etc.), children may choke on, inhale, swallow, or insert the crystal into their noses. Magnetic products with crystal applications pose a particular risk of serious intestinal injury if ingested. The application techniques as stated in the Application Manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets the relevant requirements related to small parts hazards and assess any risk it may pose to small children. Failure to follow Swarovski's care instructions may result in damage to the crystal, which could pose a risk of laceration or other harm.

### **Warning for Crystal Tattoos**

Crystal Tattoos may be applied on healthy skin only. Do not adhere to eyes or on mucous membranes. Crystal Tattoos are not recommended for young children. Loose crystals may present a small parts hazard to young children, particularly children under three years old. If a crystal comes loose, depending on the size of the crystal, children may choke on, inhale, swallow, or insert the crystal into their noses.

### **Warning for Tableware**

Application of loose crystals to tableware presents a potential risk of aspiration, choking, swallowing, or tooth damage should crystals become loose. To reduce this risk, crystals should never be applied to any surface of tableware likely to come in contact with food or the mouth, and crystals should never be placed on any tableware intended for use by children. Tableware with crystals intended for decorative use only should be marked as such. To avoid dishwasher damage, tableware decorated with crystals should be washed by hand. The application techniques or suggestions in this manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets relevant requirements related to small parts hazards or use in food contact items and assess any risk it may pose to users. The use of crystals (which may contain restricted substances deemed hazardous under local laws) and adhesives on tableware is subject to legal restrictions in specific countries. The customer is fully responsible to comply with these country-specific provisions and shall defend, indemnify, and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products and waives all its own claims against Swarovski.

### **Notice for Application on Packaging**

The use of crystal that may contain substances like lead, cadmium or hexavalent chromium, on packaging is subject to legal restrictions in specific countries, including but not limited in regard to the total content of substances based on the proportion between crystal mass to the remaining weight of packaging. The customer is fully responsible to comply with these country-specific provisions and to pass on this information to his customers.

## **Care Instructions**

Failure to follow Swarovski's care instruction may result in damage to the Swarovski product, which could pose a risk of laceration or other harm. Please be informed that all conventional laundering processes (household washing machine as well as professional dry-cleaning) have a considerable mechanical influence onto the garment, which is based on the rotation of the washing drum. The essential requirement for a safety laundering process is that the Swarovski products are properly applied without restrictions regarding the adherence of the Swarovski products. The bigger the size of the used Swarovski product is and the more Swarovski products are applied next to each other, the more a risk of damage has to be taken into consideration. Swarovski products are made of or incorporate crystal and therefore must be handled with due care! Generally, to best protect the Swarovski products from breaking we recommend the use of a soft washing bag and to fill up the washing drum. Turning inside out before washing and selection of a gentle washing program, plus the use of mild detergents are important prerequisites to safeguard the quality of our Swarovski products. Our care instructions based on DIN EN ISO 3758 list up all Swarovski product groups as overview so that each used Swarovski product still needs to be judged in terms of its cleaning suitability for the intended purpose and finished product by the customer. Swarovski's recommendations are given according to the current state of our knowledge and Swarovski's determination of the qualification as textile application product. The customer is therefore fully responsible to determine the cleaning process applicable to the finished product, taking the Swarovski care instructions as well as those of third party materials into account. The variety of shape, cut, surface effect, size and application weight respectively amount of used Swarovski products are decisive for the determination of the suitable cleaning process. To be entirely safe customers respectively dry-cleaners usually take off Sew-on Stones, Buttons, etc. of bigger size before cleaning and re-apply them afterwards.

### **Unsuitable Applications**

Crystals from Swarovski are intended for use in the fields of fashion, jewelry, accessories, textile products, and for interior décor. Due to their physical properties, crystals from Swarovski are unsuitable for other uses (e.g. gluing onto teeth, using crystals on or near mucous membranes, and other unsafe uses). The customer shall defend, indemnify and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products purchased by the customer, and waives all its own claims.

### **Responsibility of User**

Any oral, written, or test-based advice that Swarovski provides regarding techniques for application of its products are recommendations based on Swarovski's current knowledge and the information provided by its suppliers. Such advice does not discharge the customer from carrying out its own tests of techniques it proposes to use and their suitability for the intended application. The application, use, and processing of these techniques and products are solely the user's responsibility.
