THE BALANCE OF NATURE

INNOVATIONS AND INSPIRATIONS

SPRING/SUMMER 2017

WE TAKE RESPONSIBILITY

WE CREATE SAFE PRODUCTS

All our products are developed adhering to a set of principles that include not only CLEAR-conformity and lead-free, but also environmental and social compliance. All crystals from Swarovski originate in Austria, where they have been produced for the past 120 years. The Swarovski Seal and Quality Markers certify our compliance with the highest ecological, safety, and ethical standards.

WE CHOOSE RESPONSIBLE SOURCES

Sourcing responsibly means that we carefully select our suppliers and demand that they comply with our Suppliers Code of Conduct. We do not tolerate cheap or child labor practices, exploitation, or discrimination of any kind.

WE PROTECT THE ENVIRONMENT

Environmental protection means that we are constantly improving our environmental footprint along the value chain in order to preserve our natural resources for generations to come. We are working to provide clean water through the Swarovski Waterschool program and are aiming to reduce waste, emissions, and energy used in our manufacturing and supply chain.

WE CARE FOR PEOPLE

Wherever in the world we have business locations or operate manufacturing sites, we have made it our mission to care for our employees and to support the local communities. We promote social wellbeing and infrastructural developments and we encourage our employees to live this Swarovski Spirit.

WE GIVE BACK AND PROMOTE CULTURE, TALENT AND CREATIVITY

The creativity and future-oriented mindset that made Daniel Swarovski found our company in 1895 has been an integral part of our company's DNA ever since. We not only create and design new products, we also firmly believe in the future of culture, arts, and creation. Therefore, we make it our mission to support young and upcoming designers and design schools, as well as to promote and support creativity and culture.

AND WE KEEP OUR PROMISE – JUST SOME EXAMPLES:

Swarovski is a member of the United Nations Global Compact and a signatory to the UN Women's Empowerment Principles.

Our diverse workforce in Wattens alone includes 48 nationalities. At least 70% of employees across Swarovski Crystal Business are female.

Today, at our Wattens manufacturing plant, 100% of the electricity required comes from renewable sources. Of this, one third comes from our own hydropower operations.

We consistently recycle more than two thirds of the total water used across Swarovski operations. For certain processes such as grinding and polishing, we retrieve and recirculate almost 100% of the water back into the production chain.

Since 2000, the Swarovski Waterschool has educated children and communities about the ecological, economic, social, and cultural issues that affect water use on a local and global level and provided clean drinking water and sanitation in schools and communities. To date, over 257,000 students across more than 2,000 schools in five countries (Austria, China, Uganda, Brazil, and India) have benefited from the program.

CÉLINE COUSTEAU

Ever since Swarovski was founded in 1895, the responsibility to preserve natural resources has been deeply rooted in the company's DNA, as is the commitment to a working, modern-day sustainable philosophy.

It is particularly this philosophy that Swarovski shares with Céline Cousteau. Both care about the world today in order to save it for the generation of tomorrow. This common spirit has resulted in a collection of one-of-a-kind designs for the new season.

Céline Cousteau is a celebrated filmmaker, humanitarian, and environmentalist, and, as it so happens, the granddaughter of legendary ocean explorer Jacques Yves Cousteau. For Spring/Summer 2017, she presents her first ever crystal designs for Swarovski, inspired by one of her favorite places: the depths of the ocean.

Drawing inspiration directly from nature, Céline has interpreted the vital microscopic life in the oceans and brought their tiny

organisms to light in crystal. Stunningly life-like creatures adorn her collection, opening our eyes to the mysterious and mostly unseen world beneath the ocean's surface – a world on which all ocean life depends.

These mysteries need to be protected for future generations, both above and below the water.

Ocean Mysteries Jewelry Collection, designed by Céline Cousteau. Using the Jellyfish Flat Back and Fancy Stone, Sea Urchin Round Stone, Snail Pendant and Radiolarian Pendant, designed by Céline Cousteau.

THE BALANCE OF NATURE

Over the past 15 years, unprecedented radical changes have occurred on a global scale. Technology and science have invaded our daily lives and profoundly altered the way we meet, interact, live, and even age.

This constant influx of new technology has steadily become overwhelming and consequently there is an increasingly strong desire to step back and pause for thought.

In our technology-driven world, people are beginning to seek meaningfulness, fulfillment, and satisfaction in their daily lives. Wellbeing has become the global mantra.

This will become increasingly prevalent as we continue along the road to urbanization. By 2050, nearly 75% of the global population will live in an urban environment. In these megacities of the future, it is likely that many people will

suffer from feelings of stress, anonymity, and disconnection from the outside world, leading to deteriorating levels of health, both mental and physical, as well as a desire to escape and reconnect.

The huge demand for travel to untouched, almost inaccessible destinations is one example of our desire to reconnect with mind, body, and soul, as is the growing focus on the calming practices of meditation and yoga. This has resulted in a rise of new holiday destinations that answer this desire to escape and find balance in our lives and ourselves.

So pressing has this need for wellbeing become, it is estimated that wellness tourism will be worth \$678 billion by 2017.

The Millennial generation is also reassessing the concept of work and incorporating the

notion of wellbeing and meaningfulness into it. Focusing on leading a long and healthy life, rather than gaining materialistic status, Millennials mentioned in a recent global survey that they would forego a promotion or would take a cut to their salary if their work-life balance would improve as a result (Ernst and Young, 2015).

This season we are reviewing how this focus on wellbeing is influencing us and the design world as a whole.

We are examining how we can reconnect with our inner selves by focusing on the eternal elements: Air, Earth, Water, and Fire – the basis of everything we need to exist.

Welcome to our Spring/Summer 2017 Crystal Design Inspirations.

ROMANTIC EARTH

The important emergence of brown as a strong seasonal color is referenced and off-set with gray-beige tones. An eye-catching pale blue as an underlining note help to create an earthy color palette.

Segment: New Segments

CLASSIC AIR

A calm, luminescent palette of sophisticated neutrals, ranging from white to nude, pearl to soft gray, creates an element of solitude and an oasis of peace with the addition of barely-there lilac.

Segment: Jewelry

PROGRESSIVE WATER

Strong, bright colors reflect shimmering water and diverse underwater life. Rich blue and teal tones are elevated with fresh yellow and bursts of dark pink. Silvery light chrome lends a modern shine to this powerful color palette.

Segment: RTW & Accessories

GLAMOUR FIRE

Blackened embers and red hot flames with deep violet hues - the mesmerizing effect of watching a fire in the still of night, or a blazing summer sunset in all its multicolored glory, is captured in this seductive color palette.

Segment: Eveningwear

CLASSIC

AIR

Violet (371)

Greige F (284)

Silk (391)

Light Grey Opal A HF (383)

White Opal F (234)

Crystal (001)

With the rising sentiment of “tech ennui” (the feeling of exhaustion and annoyance toward technology due to the constant release of new products that take us further away from nature), we are growing increasingly weary of the ongoing incursion of new technology into our lives.

We are now taking a well-deserved break from the onslaught of technology and are beginning to focus on repairing our emotional and psychological wellbeing.

Contemplation, mindfulness, balance, and self-reflection are taking center stage.

People are yearning for a simpler way of life to allow their psyche to heal from both the changes and chaos of the recent past.

“To allow creativity to occur in today’s busy society, an oasis of peace is needed.” (20/20 Consumer Vision, 2017)

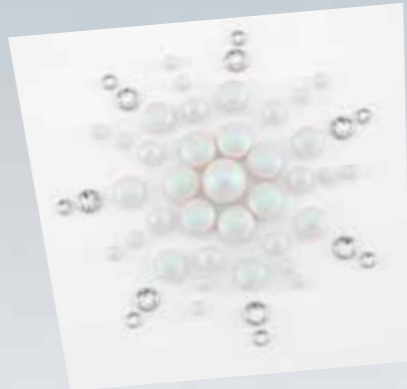

We are reassessing what we really need and value in life, and are striving for a calmer and more substantial existence.

Balance is becoming our new mantra, with a spotlight on wellbeing in both the body and mind, reflected by the increasing popularity of meditation, yoga, and remote retreats.

Our quest for contemplation and mindfulness is reflected by the development of shapes, fabrics, and materials in an effort to liberate both our body and mind.

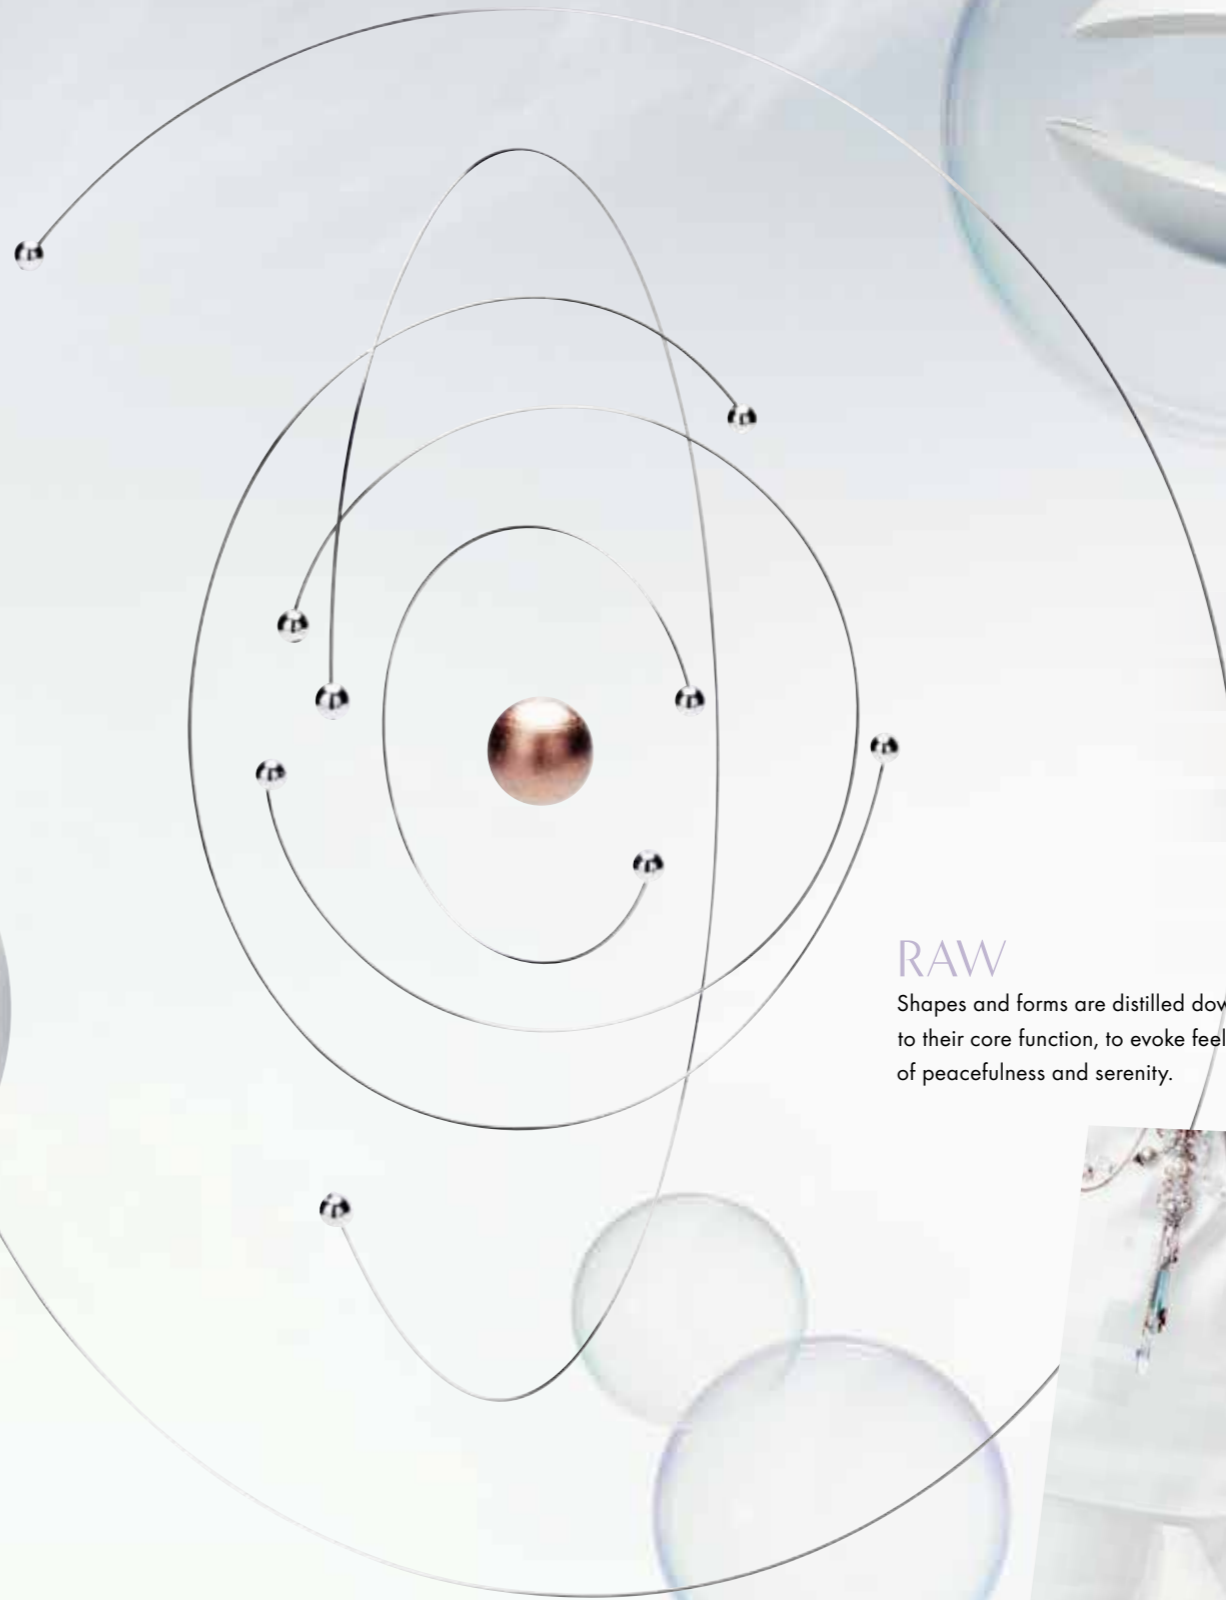

Our ultimate aim? Simply to stand still and breathe.

CLASSIC
MOOD

PURE

A minimal design aesthetic, which appears lighter than air, comes to the fore.

RAW

Shapes and forms are distilled down to their core function, to evoke feelings of peacefulness and serenity.

MINDFULNESS

We are getting rid of excess to make way for a clear and distinct aesthetic, in a celebration of the beauty of simplicity.

BALANCE

A feeling of balance is achieved with the combination of small and large crystals in a single piece.

MEDITATION

Evolving structures and a focus on the circle symbolize new beginnings.

CLASSIC
INNOVATIONS

**CRYSTAL PEARLESCENT
WHITE PEARL**

Purity and calmness remain important themes as people seek to disconnect from their busy lifestyles and the Crystal Pearlescent White Pearl fulfills this desire: A classic revisited, it features all the purity of a graceful pearl with a small contemporary twist. With its white, iridescent, frosted mother-of-pearl look, it brings a modern update to a genuine classic. Both matte and shiny at the same time, it adds a totally new effect to the Crystal Pearl assortment. The soft shimmer of Crystal Pearlescent White Pearl is perfect for pure and clean designs.

TWISTER FANCY STONE

With our reawakened desire to get back to basics, people often try to rid themselves of excess in order to free their minds from burden. In this context, modern, airy, and purist shapes have come to the fore. The Twister Fancy Stone faithfully symbolizes wind and motion, breathing fresh air into the classic assortment. Inspired by a windmill, it resembles a twirling four-pointed star. Even when still, there seems to be movement in this dynamic shape with its streamlined facets and smooth edges.

DRAGONFLY PAVÉ PENDANT

The dragonfly symbolizes harmony, change, and self-discovery – aspects that reflect important themes in life today. The refined yet ultra-light and delicate features of the Dragonfly Pavé Pendant echo the lightness of being. In order to reflect this beautiful creature accurately, Swarovski has used an elegant, filigree pavé finish, available in single-colored or multi-colored versions in nature-inspired shades, to make the body of the Dragonfly Pavé Pendant dazzle majestically. Its gracefully upturned wings reinvent this motif as an all-time favorite for delicate and romantic jewelry designs.

COLOR COMBINATIONS
AND PRODUCT INSPIRATION

JEWELRY INSPIRATION

Silver metal and ultra-light elements alternate with crystal embellished details to create a calm, light look.

Large crystals seem to be suspended effortlessly in gravity-defying structures.

White, matt sandblasted surfaces create a feeling of balance and purity.

Large, clear crystals combined with small stones evoke clarity and convey a feeling of balance.

Repeating double-sided elements express a meditative character, reflecting continuity and contemplation.

FASHION INSPIRATION

In the quest for a greater emotional connection, touch and texture add a sensory experience to materials.

There is a suggestion of streamlined layering, with varying thicknesses of materials overlapping to form a single garment.

"Experiments with materials in monochrome and geometric shapes add texture and replace prints." (Peclers, SS17)

As a reaction to the "normcore" trend that first appeared in 2013, *"There is a desire to redesign the basics by giving them an emotional and personal dimension, with an extra dose of soul to make them unique."* (Peclers, SS17)

CLASSIC

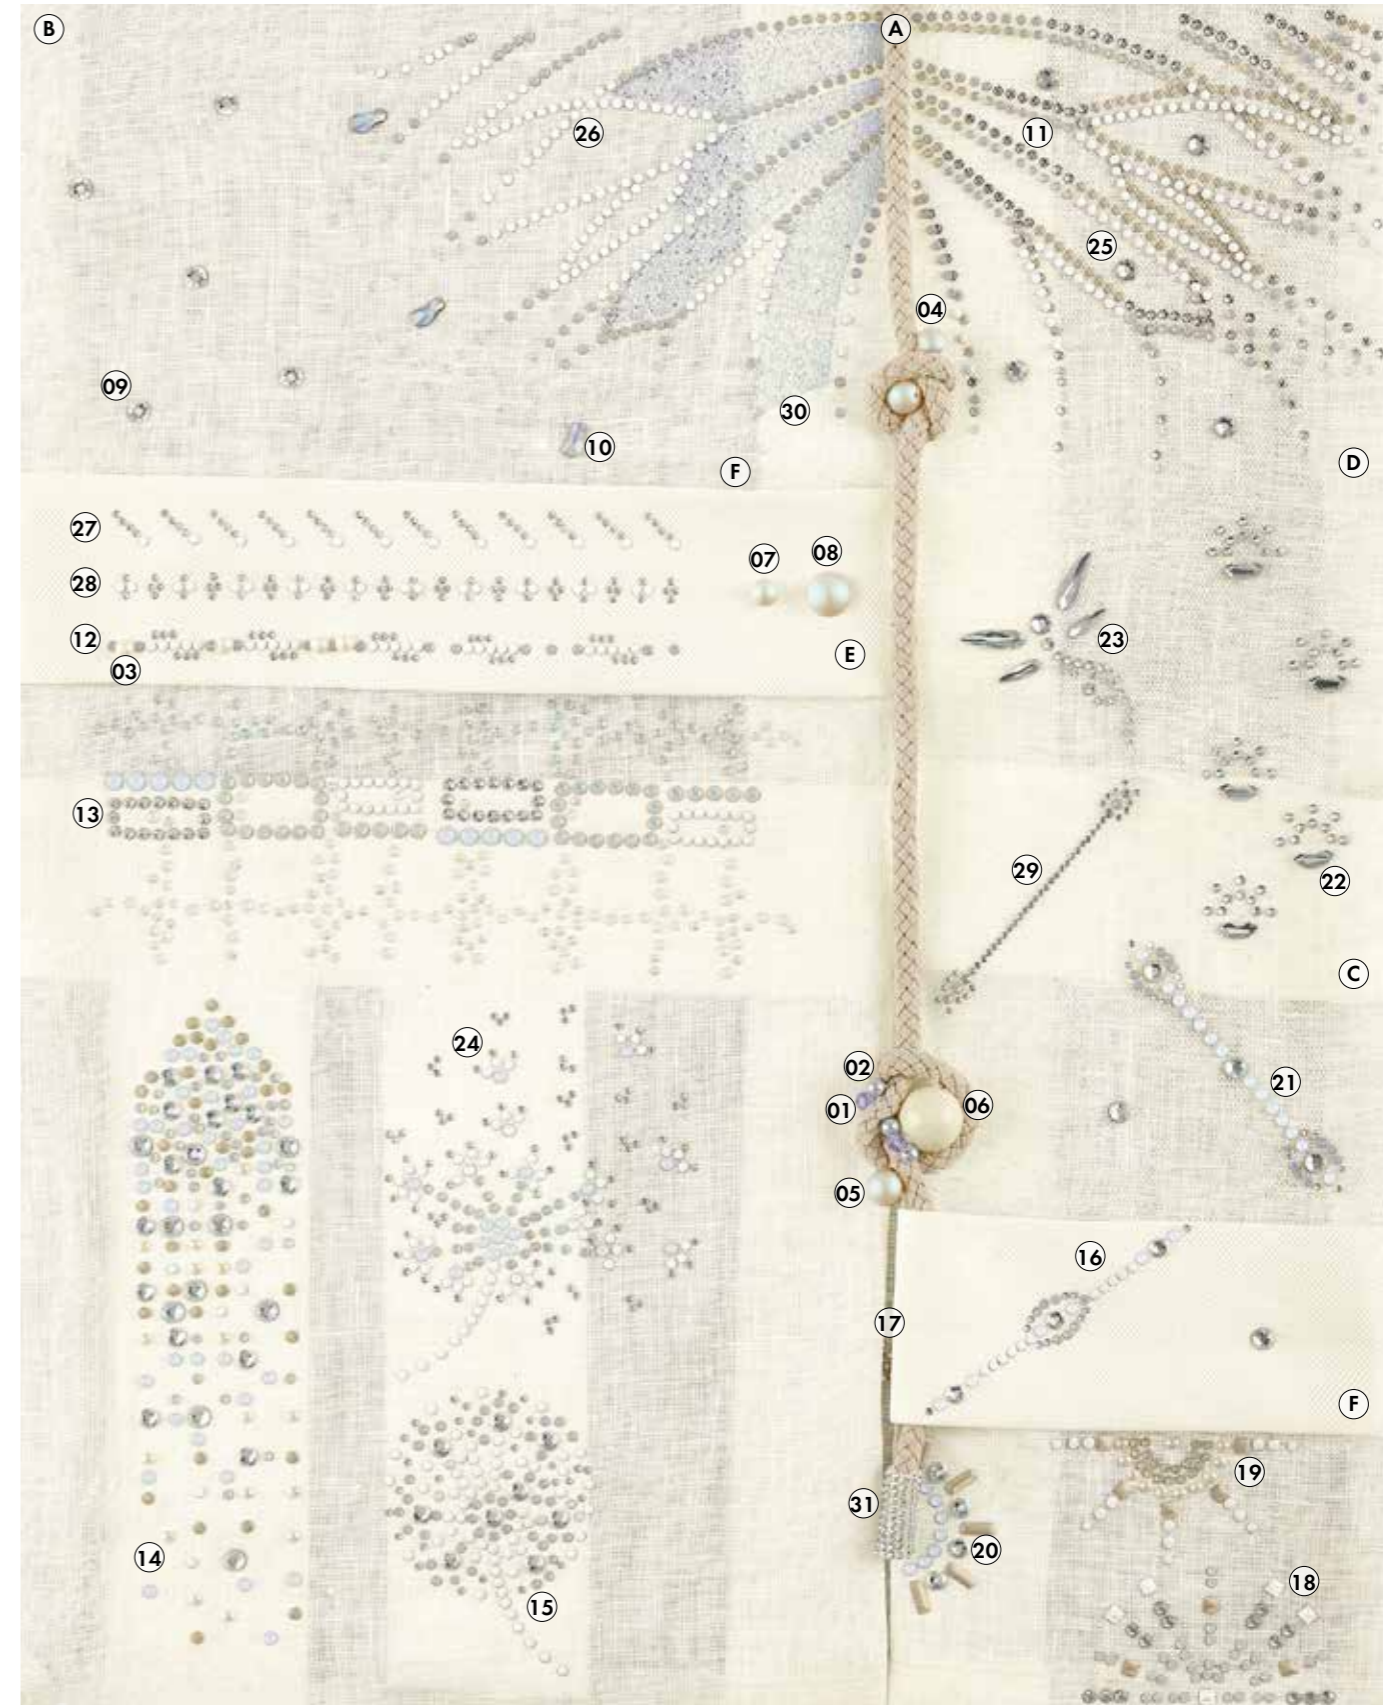

TRANSFERS FLAG

Highlighting a new aesthetic that is both minimal yet poetic, tonal Crystal Transfers are juxtaposed against different material weights to add an element of surprise to streamlined designs.

EARTH

Our near total immersion in technology has seen us become disconnected from our natural environment.

As virtual reality imposes itself on our daily lives, importance is increasingly being placed on the need for us to balance this with time spent in the natural world.

"A growing body of research indicates that being detached from nature can actually jeopardize our happiness, weaken our immune system, and undermine our creativity and ability to focus." (20/20 Consumer Vision, 2017).

With health levels deteriorating and a rise in depression, in part brought about by our increasingly sedentary lifestyles, a new focus on the earth, and getting back to nature, has arisen.

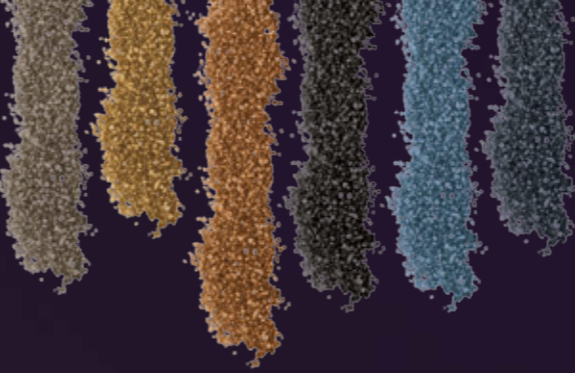

Foraging and locally grown produce have become standard, and the trend for creating food from seasonally grown, all-natural ingredients is ever more popular.

A rise in holistic medicines and herbal remedies highlights our growing desire for natural alternatives to support our sense of wellbeing.

Products and designs also convey our desire to reconnect with the earth through the use of natural materials, woven plant fibers, recycled fabrics, and crystals, offering tactile sensations.

Fashion is reworked and recycled to reference global ethnic accents, showing our appreciation for the nomadic peoples of the world, who have always understood that Mother Nature is our most important teacher.

ROMANTIC
MOOD

NATURAL

Nature continues to be ever present in design with a more elaborate and ethereal vision.

FOLK

Pared-back ethnic touches, such as Indian, batik, or European folk embroideries, lend a festival feel to fashion, modernized with a mixture of classic style directions.

HANDMADE

The desire for individualized pieces furthers the demand for handcraft, with patching used as a decorative fashion approach in combination with radiant crystal.

TACTILE

A sense of organic poetry pervades with fringing and crystals, creating a new luxurious feel.

AUTHENTIC

The slow fashion movement means that people are becoming more aware of the time needed to produce beautiful creations.

ROMANTIC
INNOVATIONS

GRAPHITE

As a reaction to today's high-tech, over stimulated world, people are increasingly drawn towards dark, neutral hues that evoke a sense of tranquility. Graphite, with its deep, shadowy character, speaks to this desire by being both mysteriously glamorous yet calmly classic. It brings a dark and strong, bluish gray-black tone to the palette, elegant and understated, with a strong unisex and universal color message.

CONTOUR FLAT BACK

The Contour Flat Back responds to our continuing quest to achieve a sense of grounding. Given the current turmoil in the world, there is a rising demand for designs that reflect the raw, natural, and unspoiled beauty of the planet; a beauty that follows its own rules. Its entirely new, sophisticated outline, with its asymmetrical facets and table top, is formed in a shape that is slightly reminiscent of natural rock or a footprint. It gives the impression of a natural discovery that has been molded by wind and water over the centuries.

TIGER PAVÉ PENDANT

Depicting an endangered animal, the Tiger Pavé Pendant represents our desire to protect and preserve the environment and its majestic creatures. In line with today's need for resilience, the tiger reflects power, strength, and a fighting spirit. A breathtaking example of the unrivalled crystal design skills of Swarovski, the Tiger Pavé Pendant uses an elegant, filigree pavé finish, interwoven with metal surfaces that bears a striking likeness to its natural counterpart.

SCARAB BEAD

As creature of the earth and a "messenger" for the connection between man and nature, the scarab is a strong symbol of the natural life cycle. It has long been used as a talisman in many cultures. Stunningly realistic, even down to its very size, the Scarab Bead is made using innovative crystal cutting technology, combined with detailed molding of the creature's head and wings.

JEWELRY INSPIRATION

Suspended circles with delicate pavé settings reinterpret traditional jewelry styles and reflect the need for continuity and new beginnings.

Working with natural materials remains a core focus for designers, combining metals and pearls to produce modern tactile pieces.

Customizable Crystal Graphic Fabric is incorporated into locket, representing our continued interest in unique pieces and personalized designs.

Beautifully arranged charms show heritage and pride.

Crystal Flat Backs bring an update to traditional motifs and lends a sense of modern romanticism to boho-inspired designs.

03

FASHION INSPIRATION

Traditional elegance and subtlety mark our approach to the use of patterns.

Ancestral artisan techniques are combined with natural materials to form experimental shapes and novel material effects.

In order to appeal to modern globetrotters, ethnic styles are given a modern contemporary twist, favoring streamlined and classic shapes.

Handcrafts such as "...weaving [will] become the spearhead of creative recycling". (Promostyl, SS17)

ROMANTIC

WATER

The most powerful of all life forces, water is a commodity that is fiercely fought over – without it we simply cease to exist.

Indeed, wars over water rather than crude oil are tipped to dominate future crisis scenarios.

Increasingly aware of the scarcity of clean water, we are becoming more mindful of maintaining this precious resource and preserving the natural habitat in the realization that this is inherently vital to our continued wellbeing.

Wellness spas centered on water and hydrotherapy are on the rise, while aquariums and underwater hotels help to highlight the inherent beauty of the marine environment.

Paying homage to this rare and special resource, designers are also embracing water in all its forms.

Designs echoing the brilliant hues of coral reefs draw our attention to the need to preserve these fragile marine environments, while modern, geometric, and still designs highlight a focus on the grandiose architecture of modern pools.

Whether we highlight its devastating power, celebrate its depth and stillness, or simply gaze at it in contemplative awe – water, with its symbolic sense of rebirth and renewal, is once again holding the design world in thrall.

FLUID

The shaping and molding of natural water-inspired structures and forms continues to be a core design element.

BODY-CON

Fashion focuses on form with easy-to-wear pieces in bright hues, boldly decorated with crystal for a new daywear design aesthetic.

POWER

Powerful patterns emerge in design, as a reaction to the on-going "Austerity Fatigue" mindset.

MOVEMENT

Shapes generated by the movement of water step to the fore - undulating, wavy elements are heavily embellished with crystal.

SLEEK

Sports-inspired elements - bands and straps - are combined with crystal to create new luxury details in accessories.

PROGRESSIVE
INNOVATIONS

YELLOW OPAL

As the digital age continues, modern social media culture has created a new bold aesthetic in which bright colors are stepping to the forefront. The inspiration behind Yellow Opal lies in the natural gemstone Citrin, creating a bright, happy yellow shade with an opalescent finish. Made with Advanced Crystal, Yellow Opal is a new first in the Swarovski color assortment. It is both fiery and elegantly matte, combining the power of color with genuine gemstone appeal.

RAINDROP PENDANT

In contrast to other drop shapes, the Raindrop Pendant is truly captivating with its beautifully elongated silhouette and slim geometry that resembles a raindrop falling from the sky. As such, it speaks to our desire to reconnect with nature, with clarity and refined shine taking center stage as we seek calmness to compensate for our hectic lives. Its multilayer cut creates a playful sparkle that adds to its simple, natural appearance.

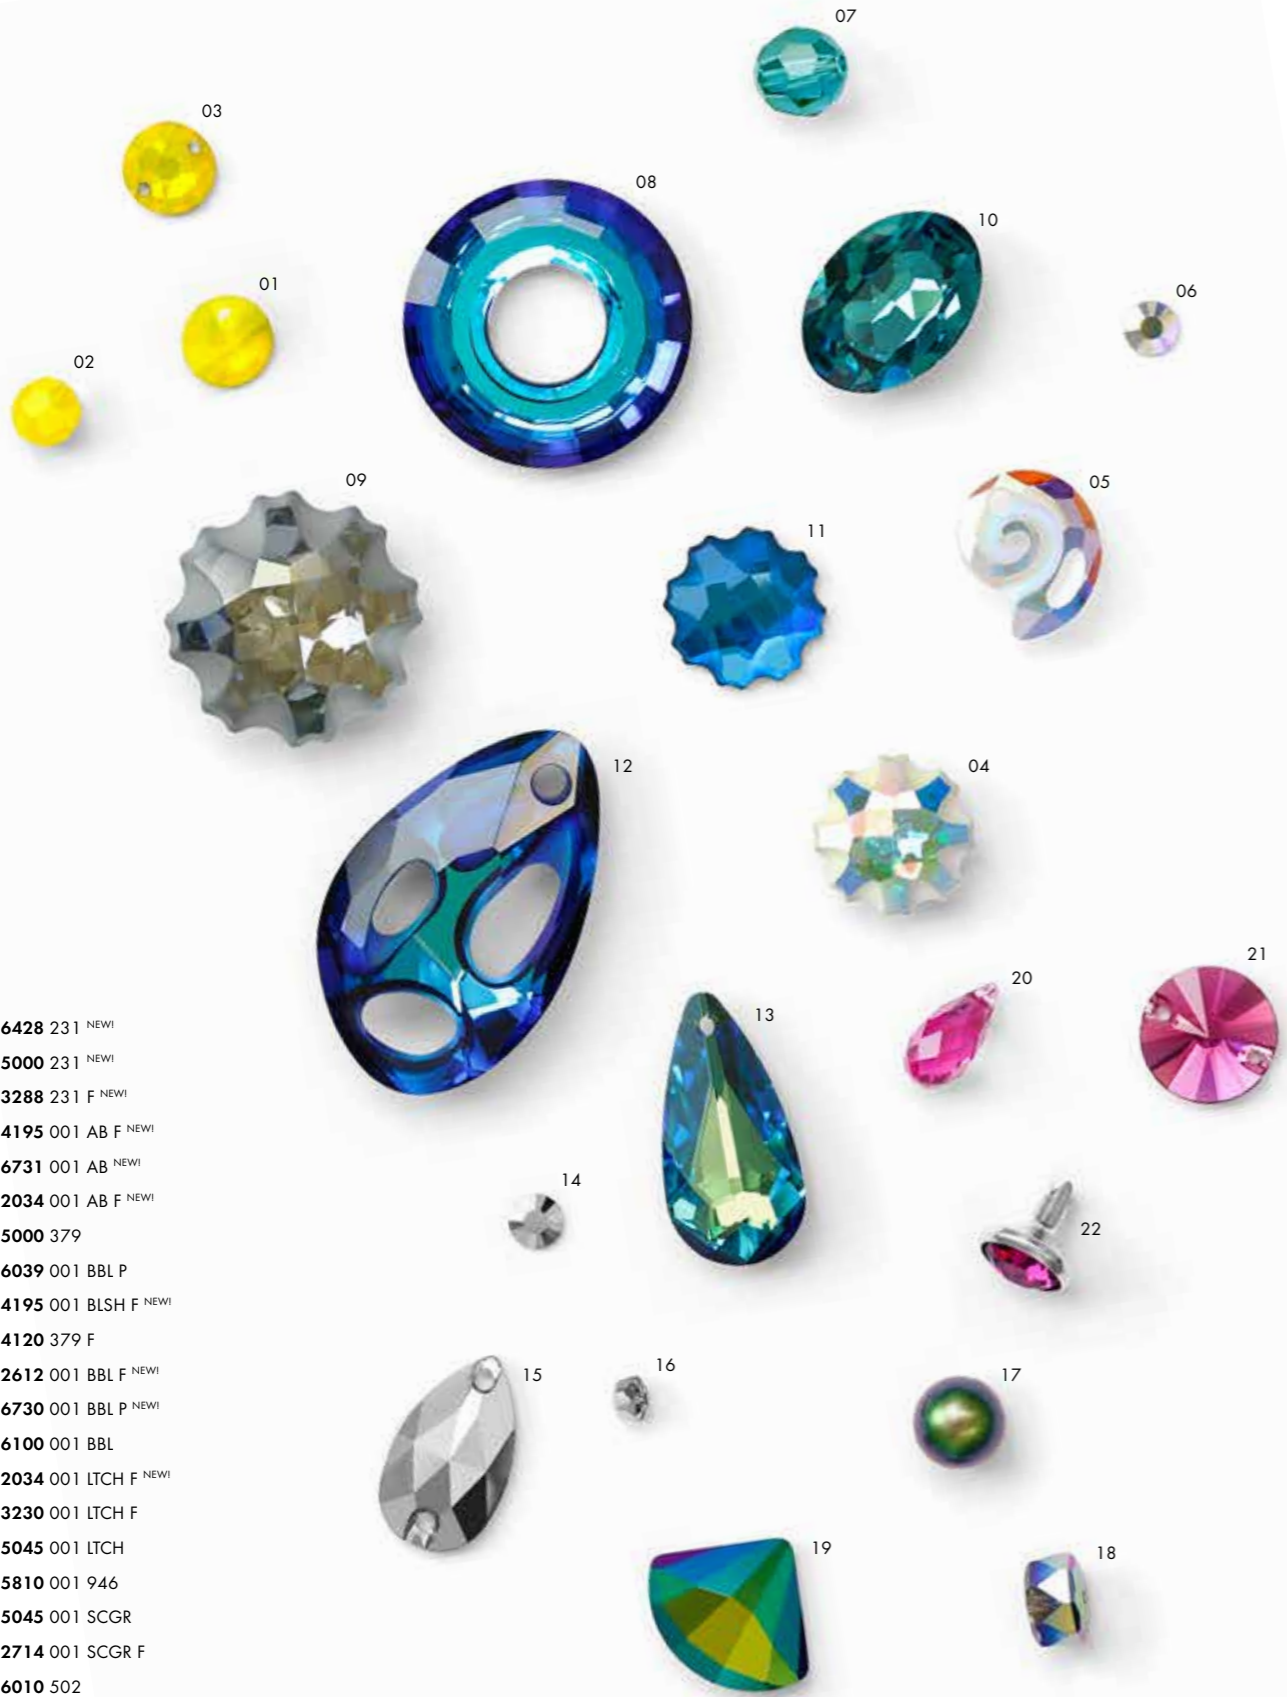

RADIOLARIAN PENDANT

The striking Radiolarian Pendant is a design by Céline Cousteau, celebrated filmmaker, humanitarian, and environmentalist. As a powerful ecological statement, she presents her first ever crystal designs for Swarovski, inspired by one of her favorite settings; the depths of the ocean. Radiolarians are single-cell organisms that are awe-inspiring when viewed through a microscope. With a dynamic interplay of shiny and partially frosted facets, this design highlights how Mother Nature is a perfectionist in even her tiniest creations.

SEA URCHIN ROUND STONE

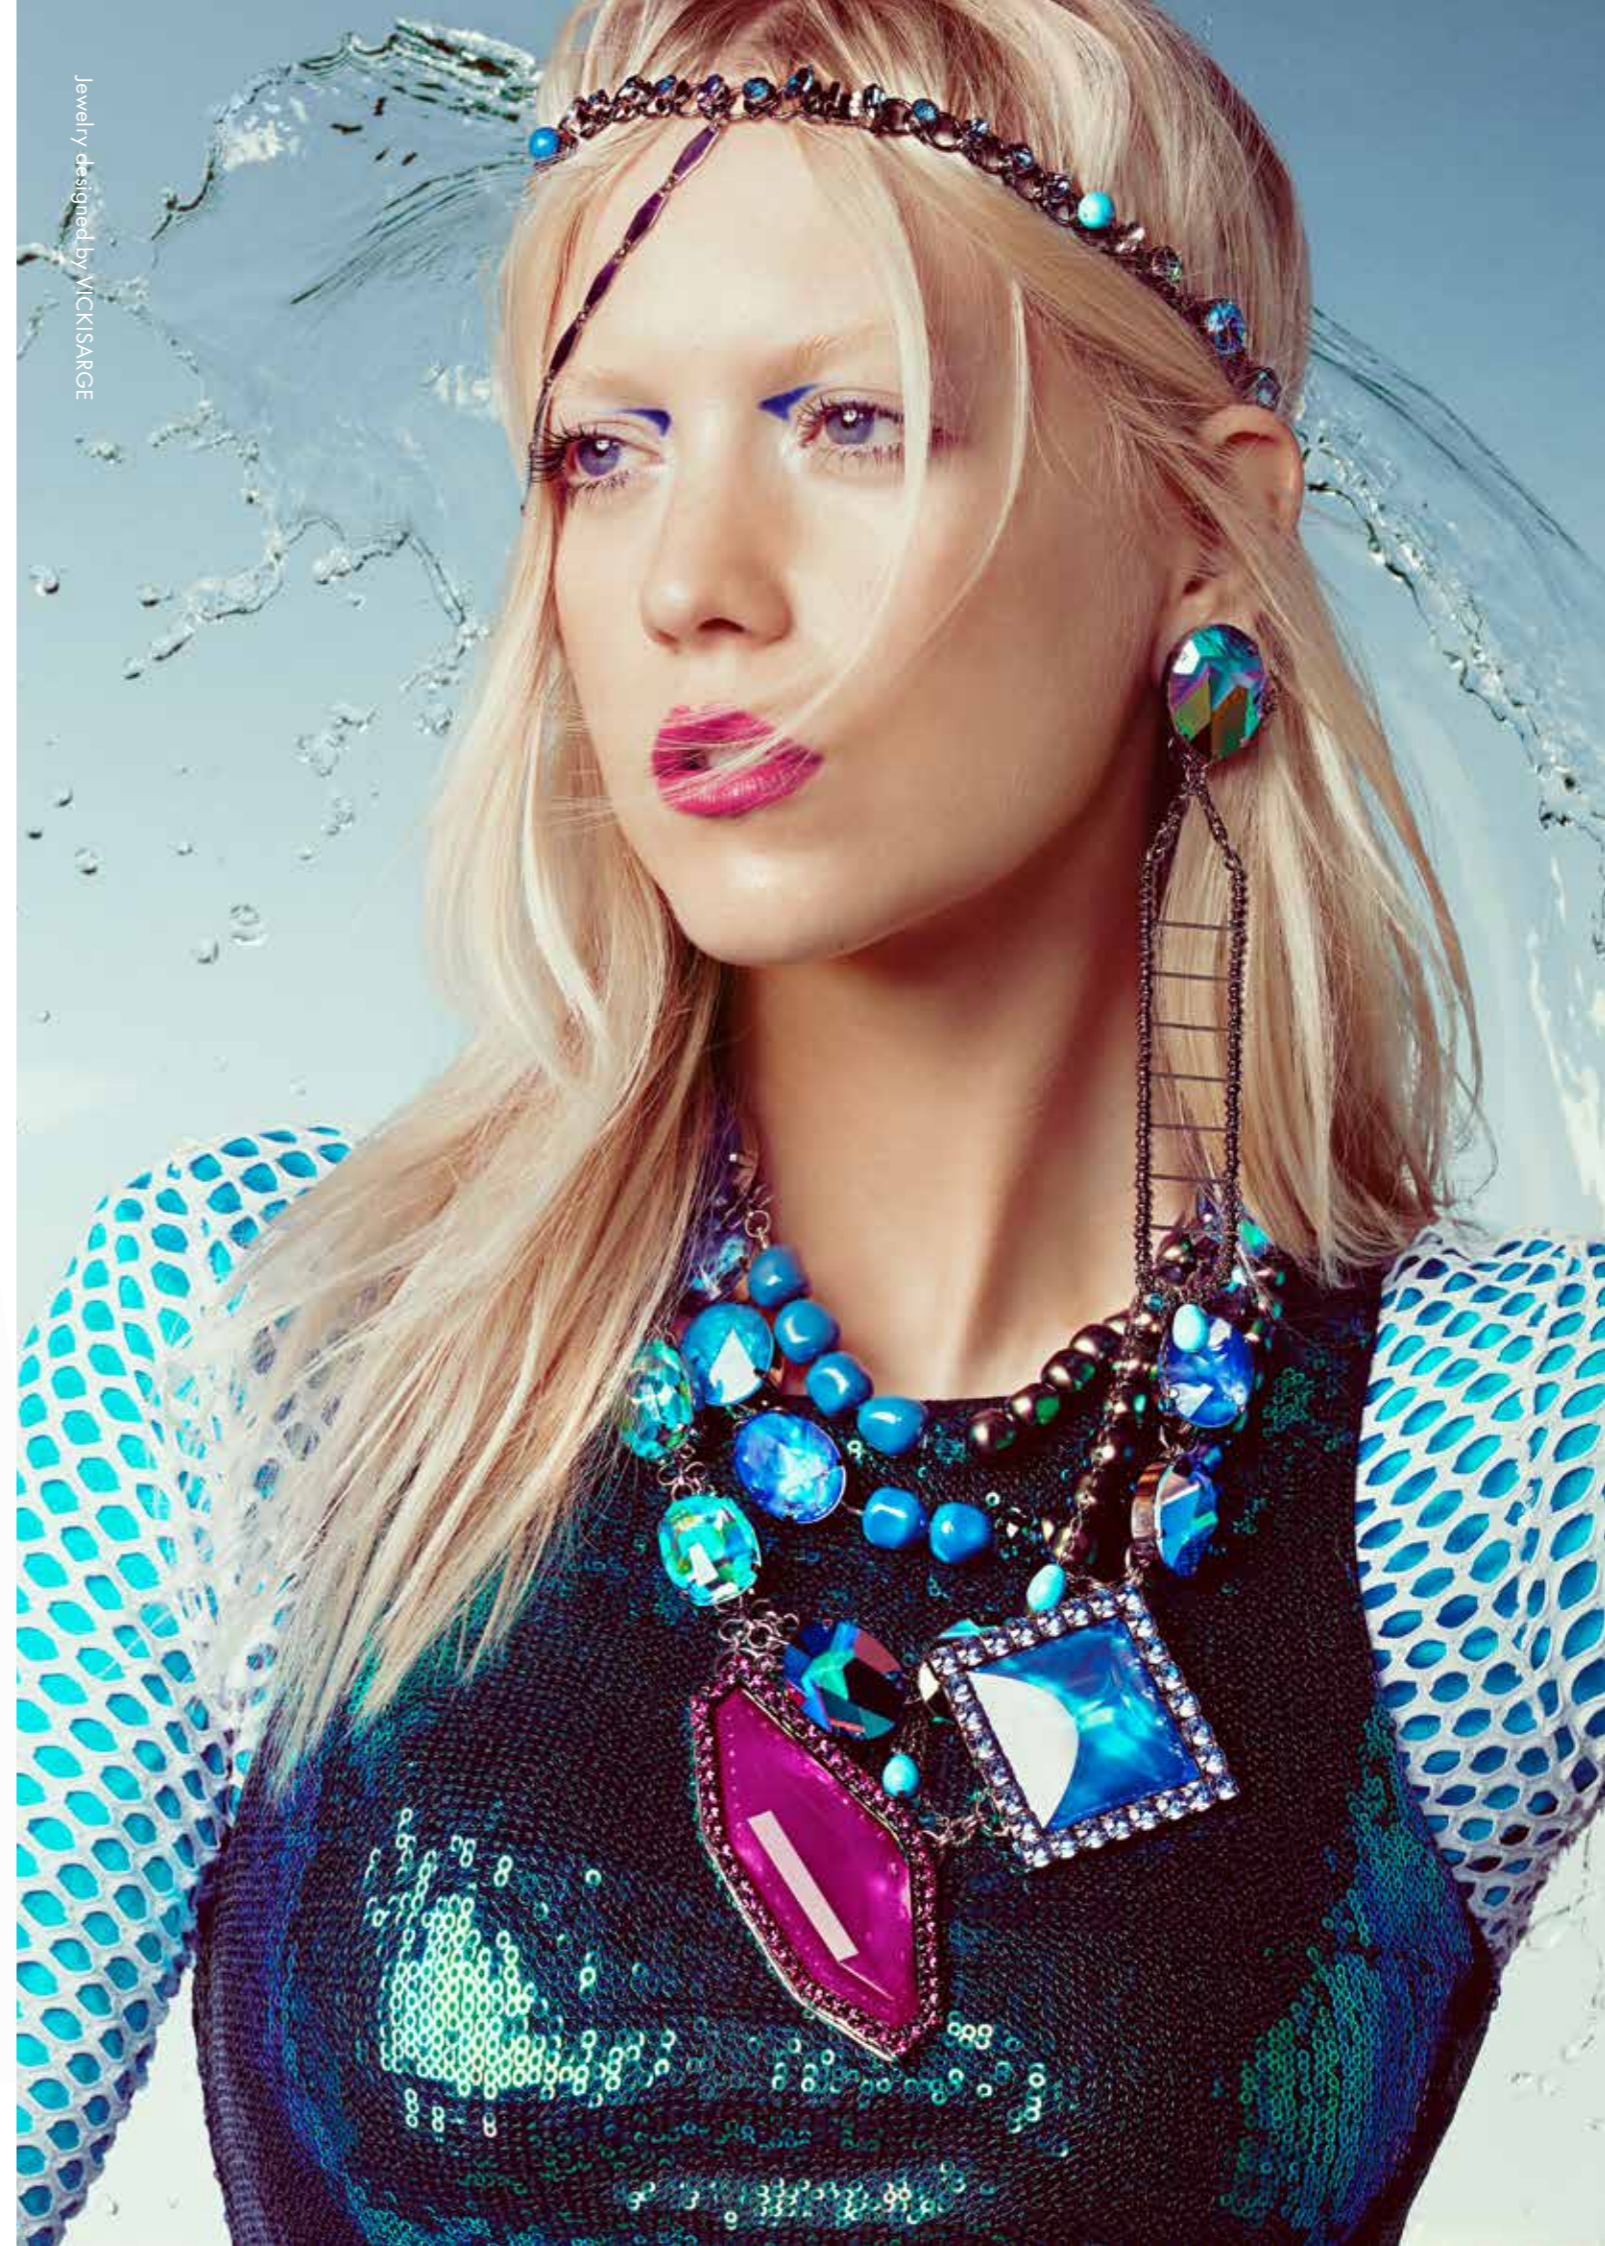

Another design by Céline Cousteau, the Sea Urchin Round Stone takes inspiration from nature itself and leaves its beauty unaltered. Captivating and spellbinding, it plunges the wearer headfirst into a beautiful underwater world. A harmonious interplay of matte and shiny surfaces creates an irregular star shape in the center, reminiscent of the spiky sea urchin.

COLOR COMBINATIONS
AND PRODUCT INSPIRATION

JEWELRY INSPIRATION

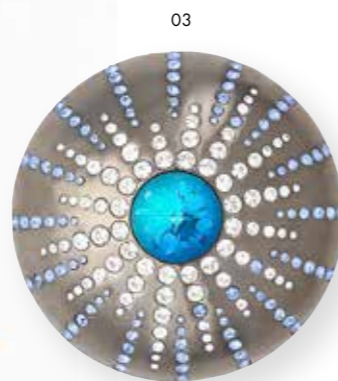

Our fascination with underwater life continues, where mysterious creatures and new fantastic crystal shapes lend endless inspiration to designers.

Streamlined mosaic settings combine with crystal to reference movement and flexibility.

Pavé settings are alternated with the new Céline Cousteau Ocean Mysteries Collection for an elaborate and mystically modern look.

Instantly drawing attention, color is a focal design element that adds a progressive and futuristic feel to designs.

Fine crystal pavé embellishment emulates delicate, elaborate marine structures.

FASHION INSPIRATION

The fluidity of modern lifestyles extends to fashion, where daywear and eveningwear continue to merge with magnificent crystal combinations.

The ongoing focus on tactile fabrics and crystal components reflects our hunger for more sensory experiences in order to reconnect with ourselves.

Wavy and layered materials are combined with Crystal Transfer designs to emulate the movement of water.

Glittering crystal components reflect the beauty of light on water.

Robust elements in crystal and synthetic materials harmoniously merge with softer fabrics.

Fastenings borrowed from sportswear are placed in different contexts to create surprising accessory innovations.

FIRE

As a slow-burn reaction against the functional, yet nondescript norm-core trend, an “anti-austerity” sentiment has now risen to prominence.

Focusing on the fire within, our desire to highlight our individuality has reached boiling point and is spilling over into the design world.

Passion is re-ignited in the celebration of the female form – strength, desire, and flexibility are conveyed by a glamorous and fierce design ethic, while red-hot fashion highlights the new sensual, powerful female.

Our re-awakened appetite to “show-off” comes from an increasing anti-investment mindset, coupled with the rise of enhancement culture.

Constant social editing and our focus on our “optimized selves”, has ushered in the new “glamcore” trend, heralding the return of haute couture in a completely different guise.

“With this celebration of clothing comes the sudden understanding of the comeback of couture, the ultimate way to conceive a garment. The customization of creation will become an important part of the industry and will generate new ideas about textile and color choices, as well as fit and general appeal.” (Trend Union, SS17)

Hence, a new modern muse is created – strong, fierce, and determined – she offers no apologies for her glittering, radiant, show-stopping style.

GLAMOUR
MOOD

VOLCANIC

Designs are inspired by the energy and wildness of the natural elements, where wood, lava, and crystal create excitingly glamorous designs.

PASSION

Blackened and burnt surfaces paired with radiant crystals constitute a unique design aesthetic that speaks to our demand for individualized and slightly mystic designs.

MODERN

New opulence lies in surprising material improvisations, with luxurious materials such as crystal merging with the every day.

SENSUAL

The juxtaposition of large and small crystals continues the desire to create facility in design.

FIERCE

The emergence of the new "glamcore" direction references our obsession with enhancement culture and the re-emerging desire to show-off.

GLAMOUR
INNOVATIONS

FLAME FLAT BACK

The Flame Flat Back reflects our search for passion and love for life in a world where we feel increasingly disconnected from our human emotions. As its name suggests, the pear-shaped outline and multilayer cut of the Flame Flat Back echoes a real candle flame, especially when used in two-tone colors that imitate real fire, such as yellow, orange, and red, reigniting the classic drop shape as one of the bestsellers in the assortment.

PANTHER BEAD

A classic returns, more striking than ever before: The Panther Bead brings a new level of story-telling into the world of design. Taking crystal cutting to new heights, the artistically designed and cut bead depicts the head of this feline predator that symbolizes night and a dark moon, strength and gracefulness, and mirrors the current rise of the powerful female.

GRAPHITE

Elegant and mysterious, Graphite lends itself perfectly to strong and powerful designs. Its sophisticated bluish gray-black tone features an entirely homogenous surface, rendering it ideal for creating graduated transitions between Crystal Silver Night and Jet. Graphite is an all-purpose color and is destined to be a new design favorite.

YELLOW OPAL

A vibrant yellow shade with an opalescent finish inspired by natural gemstones, Yellow Opal speaks to our desire for refined shine. It brings brightness to every design, provides the perfect complement to bright Spring/Summer collections, and also pairs well with classic shades. Long anticipated, Yellow Opal will open up countless new design possibilities.

JEWELRY INSPIRATION

Opposites meet in this modern glamour direction in which shiny lacquered surfaces merge with glamorously shimmering crystal backgrounds.

Jewelry plays with smooth and rough surfaces, lending an additional sensory aspect to opulent designs.

Refined tassels and miniscule pavé settings meet bold statement crystals expressing passion and the fire within.

Elegant chains become a strong statement jewelry element, brought up-to-date with Crystal Fabric and gunmetal finishes.

Large Fancy Stones in Yellow Opal are framed with dark crystals, expressing both power and sensuality.

FASHION INSPIRATION

Smokey, volcanic design embellishments promote the idea of erupting sensuality.

A desire for elegance and the subtlety of tradition receives an update in contemporary crystal designs.

The focus remains on headwear and forms of veiling, as we continue to seek anonymity in an overly digitalized world.

Fringing becomes more widespread, referencing flickering flames to create movement and fire in designs.

The juxtaposition of sleek forms and crystal combined with tactile tassels offer a new take on luxury.

Individualization continues to remain at the forefront of design as the "glamcore" trend takes over.

JEWELRY DESIGNER

VICKI SARGE

Photographer: Cozra Lozano

Vicki Sarge began collecting jewelry as a child. Today, she produces sought after costume jewelry. Mixing crystals and semi-precious stones with adventurous and advanced materials, VICKISARGE jewelry is designed and made on site at the workshop within her Belgravia, London boutique. While the painstaking craftsmanship and fashion-forward spirit defining her work recalls legendary bijoux de couture handmade in Paris, Vicki draws her inspiration from myriad sources including her own life, the energy of the late Seventies Manhattan nightclub scene, Eighties fashion, architecture, film and contemporary and ancient culture. Vicki's designs have been inspired by Swarovski crystals since 1983 when she used vintage Swarovski on Suede. Since then Swarovski has been a constant source of inspiration with their creative innovations and new materials.

VICKISARGE jewelry adorns high profile women with great personal style including Beyoncé, Samantha Cameron (the wife of the British Prime Minister), Paloma Faith, Lana del Rey, Elle Macpherson, Kate Moss and Emma Watson. Vicki frequently makes jewelry collections for the catwalk shows

of leading fashion designers including Dries Van Noten, Erdem, Givenchy, Raf Simons for Jil Sander and Richard Nicoll. She collaborated with Mario Testino to produce jewels for his MATE collection inspired by lavish Peruvian folkloric costumes featuring in his Alta Moda photographs and most recently worked with hairstylist Sam McKnight to create a line of floral hair accessories for Net-a-Porter. As an original founder of the jewelers Erickson Beamon, Vicki's artistry has been celebrated by designers and collectors the world over.

CLASSIC

This piece is our interpretation of a dandelion. Many of us experience our first taste of aerodynamics by blowing these small seedlings into the wind. We have crafted a classic necklace which has an extension as a body piece that gently wraps around the body.

ROMANTIC

Adornment is as organic as nature itself. Since the beginning of time man has turned beautiful materials into self-expression. We have chosen to create a tribal style to show how crystals can form a romantic reflection of history and still feel like nature itself.

PROGRESSIVE

The action of fluidity is interpreted in this piece which flows from the head to the neck in wonderful shades of blue with small droplets of crystals. We have used crystals mixed with modern materials and added a shock of fluorescent to mimic the experience of looking through water into a coral reef.

GLAMOUR

The colors of the Swarovski crystals are the inspiration in this piece. They are so full of life and energy that the piece itself feels almost too hot to handle! The flame starts on the arm and then flows like the molten rock of a volcano to create a mysterious, fascinating shroud from which life re-emerges.

Why Swarovski

EXCELLENCE, THROUGH INNOVATION AND ORIGIN

X-CUT
Advanced optical measurement and high-precision manufacturing deliver premium cuts characterized by unmatched brilliance.

HOTFIX GLUE
The variable temperatures at which Hotfix glue can be activated enable the application of crystals on a broad range of textiles.

PLATINUM PRO
With its new advanced foiling technique, Swarovski has set a new standard in the lifespan of crystals.

CRYSTALS - MADE IN AUSTRIA
The combination of innovation with sustainability and respect for individual wellbeing means that quality is always assured.

PREMIUM, BY SERVICE AND DESIGN

DESIGN SERVICE
Throughout its global network of Design Centers, Swarovski offers exceptional service provided by the industry's best creative talent.

GLOBAL SERVICE
Swarovski's Global Service Network provides customers with dedicated personal assistance on a local level.

APPLICATION SERVICE
A comprehensive range of application services means customers benefit from the extensive experience of leading international experts, as well as internal specialists.

DESIGNER EDITIONS
Creative collaborations with top designers result in exclusive cuts and unique designs for Swarovski crystal.

COMPLIANCE, WITH INTEGRITY

ADVANCED CRYSTAL
Swarovski's patented lead-free* formula has changed the DNA of crystal while still offering the same sparkle, dependability, and variety for which Swarovski is famous.

CLEAR
Regular legal monitoring of chemical requirements and reasonable testing provide customers with the comfort of trust in Swarovski's products.

*Crystal glass and all other materials containing 0.009% lead or less.

OEKO-TEX
Oeko-Tex® Standard 100 Class II (direct contact with skin) certification creates confidence in chemical safety of textile applications.

COMPLIANCE SERVICE
Assessments regarding substance limitations as well as compliance information and advice to support customers in complying with relevant laws, regulations, and voluntary standards.

SEAL YOUR SUCCESS

NEW CUTS DESIGNED BY CÉLINE COUSTEAU

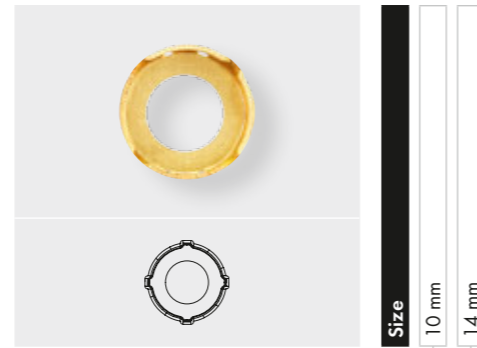

Design Story: A love for the sea runs through her veins: Céline Cousteau is a celebrated filmmaker, marine conservationist, and, as it so happens, the granddaughter of legendary ocean explorer Jacques Yves Cousteau. She presents her first ever crystal designs for Swarovski, inspired by one of her favorite places, the depths of the ocean. Taking inspiration from nature itself and leaving its beauty unaltered, her stunningly life-like creatures are not only captivating and spellbinding, they also draw attention toward the mysterious, mostly unseen, and unexplored world beneath the ocean's surface on which all ocean life depends. These mysteries need to be protected for future generations, both above and below the water.

Flat Backs Hotfix

Framed Flat Backs

FRAMED FLAT BACKS

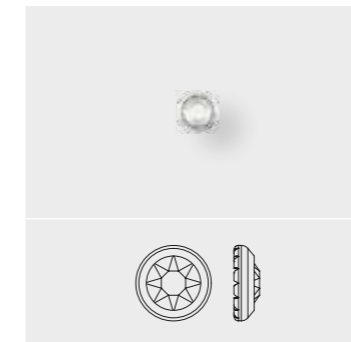

The Framed Flat Backs present themselves as a highly upgraded version of ringed roses: They encase a XIRIUS crystal, the most brilliant crystal on the market, with new metal components in plating colors silver, gun metal, and gold. Both the plating quality and the glue applicability have been greatly improved. The Hotfix glue surface has been optimized, the metal part boasts a higher corrosion resistance than ever, the color assortment has been widened and for ideal results there is an application instruction that provides quick and easy guidance.

APPLICATION ADVICE

Framed Flat Backs Hotfix can be easily applied by using a standard heat press. The use of a transfer film may be helpful to assure that the crystals are kept in position and also to be able to turn the fabric. For a satisfying bonding and to avoid glue residues, please also pay close attention that not too much pressure is used. The application should be done with low pressure. Use a pressing cloth to apply additional pressure to the product immediately after the application and do not remove the transfer film until the fabric and the crystals are completely cooled. The following parameter should give you an overview about the possibilities of applying this product onto different fabrics. We strongly recommend carrying out tests with the original fabrics to ensure the right conditions and to establish the best choice of application aids.

FRAMED FLAT BACK

CARE INSTRUCTIONS

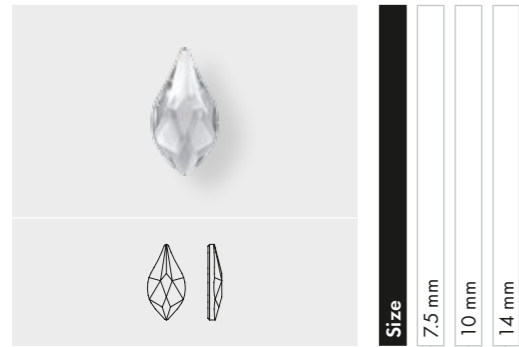

GENERAL RECOMMENDATIONS	Turn inside out, choose a gentle wash cycle, and use a mild laundry detergent.	Do not use chlorine bleach!	Turn inside out and dry at lower temperature.	Turn inside out and iron using an iron setting for silk/polyester/viscose.	The textile can be gently dry cleaned using perchlorethylene. Turn inside out.	The textile can be gently dry cleaned using hydrocarbon. Turn inside out.	The textile will withstand gentle professional wet cleaning. Turn inside out.
	To protect the crystals as effectively as possible, the use of a soft wash bag is recommended.				To protect the crystals as effectively as possible, the use of a soft wash bag is recommended.		
FRAMED FLAT BACKS	✓	✓	✓	✓	✓	✓	✓

Please note that with all standard washing processes (whether carried out by a household washing machine or via dry cleaning) the rotation of the drum places significant mechanical forces on the textiles. The most important factor in ensuring a secure wash is correctly applying the product, without compromising its adhesion. The larger the product employed, and the more products are applied next to each other, the greater the risk of damage.

Please refer to the Application Manual and our Business Website SWAROVSKI.COM/PROFESSIONAL.

SPECIAL MOTIF SERVICE

A special motif is a design created by the customer which is different from the Crystal Leatherette-it Collection. This service opens up many customization possibilities and enables you to benefit from Swarovski's longstanding experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You may also submit sketches of a design to suit your personal requirements – such as a brand image or an image that complements a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which allows for easy adjustments tailored to your needs.

Required information for Crystal Leatherette-it

contour:	
data format	vector graphics (e.g. .dxf, .ai)
embossing:	
data format	raster graphic (png)
resolution & size	raster graphic should contain size information (300dpi)
colors	black and white (no greyscale)

CUSTOMIZATION POSSIBILITIES

- Change color of an existing crystal stone
- Change color of artificial leather
- Up to three different stone colors per motif are possible
- With or without embossing possible
- Mixing of different stone sizes within one motif is NOT possible

DESIGN GUIDELINES

Max. motif size	220x350 mm
Min. motif size	10x10 mm (or effective surface of 1.0 cm ²)
Min. width of surface within motifs	Part of motif without stone: 3 mm With stone (concentric): PP7: 5.5 mm PP12: 6 mm PP17: 7.5 mm
Offset of embossing	embossed lines that are to meet the outer edge of your design need to be drawn 1 mm over the contour line
Min. line width / dot size of embossed line / dot	0.9 mm / 30 dpi
Min. distance between embossings	0.2 mm / 85 dpi
Min. font size in ref to Arial font	2.5 mm
Distance between stone and embossing	0.8 mm
Distance between stone and contour	2.0 mm
Distance between stones	PP7 1.0 mm, PP12 & PP17 1.5 mm
Tolerance of artificial leather contour	+/- 0.1 mm
Tolerance of stone position used as a dot in a text or placed concentric to an embossed circle	+/- 0.8 mm

ORDERING PROCESS

Send the request with a drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif.

You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

IMPORTANT INFORMATION

Please always submit your drawing of the desired motif in the actual size you require (dimension of outline and embossing have to be clear). When enlarged to the desired size, a small sketch will have blurred lines that will make it difficult to correctly reinterpret. The information can also be sent via e-mail or on a CD-ROM. If sending a sewing pattern, please include the whole pattern and not just cut outs. If the sketch is submitted as a hard copy by fax or e-mail, please include a scale legend (e.g. copy/scan with ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

If detailed information on possible tolerances is needed (e.g. cavity production for a metal part) please contact Swarovski and an application request will be placed in our application database.

If considered feasible, special productions are generally offered to all our customers. Please note: special productions are subject to acceptance by Swarovski and the order of a design does not automatically grant exclusive production of this design for the customer.

For detailed application information, please refer to the Application Manual and our business website SWAROVSKI.COM/PROFESSIONAL or contact your Swarovski sales office.

APPLICATION ADVICE

When gluing Crystal Leatherette-it, the surface has to fulfill all the general requirements for gluing, i.e. it must be clean, dry, and free of oil and grease. Before processing we recommend measuring the tension of the surface with a Test Pen (available from Swarovski, art. 9030/000). A surface tension of at least 38mN/m is recommended for gluing. If the surface tension is below this value, pre-treatment methods have to be executed.

Crystal Leatherette-it can be also applied onto a wide range of solid materials by creating a cavity. The cavity enables the motif to be easily positioned and ensures a higher protection of the motif against mechanical and chemical stress. These cavities can be produced by milling (e.g. CNC machines). For detailed information on tolerances please contact your Swarovski sales office. After the application, it takes around 72 hours until the final adhesive strength is reached. During this time, mechanical stress should be avoided.

Please refer to the Application Manual and our Business Website SWAROVSKI.COM/PROFESSIONAL.

Transfers are ideal for Hotfix application on all kinds of textiles. They are available in a large range of motifs from the in-house design team, but also offer customizing possibilities with different articles from the Flat Back Hotfix assortment.

CERALUN LINE EXTENSION IN COLOR ASSORTMENT

An absolutely essential material for innovative design is now available in a new color which harmonize perfectly with the new colors Graphite and Yellow Opal.

ARTICLE EXPLANATION

Ceralun™ is a versatile and strong two-component, high-performance ceramic epoxy composite. The clay has been specifically developed and tailored to embed foiled and unfoiled crystals. It is an absolutely essential material for innovative design.

Ceralun has a high level of hardness, rigidity, and shock absorbance. It is resistant to perspiration, humidity, or climatic changes and shows no aging.

General Warning

Loose crystals may present a small parts hazard to young children, particularly children under three years old. Depending on the size of the crystal and any attached material (such as glue, fabric, etc.), children may choke on, inhale, swallow, or insert the crystal into their noses. Magnetic products with crystal applications pose a particular risk of serious intestinal injury if ingested. The application techniques as stated in the Application Manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets the relevant requirements related to small parts hazards and assess any risk it may pose to small children. Failure to follow Swarovski's care instructions may result in damage to the crystal, which could pose a risk of laceration or other harm.

Warning for Crystal Tattoos

Crystal Tattoos may be applied on healthy skin only. Do not adhere to eyes or on mucous membranes. Crystal Tattoos are not recommended for young children. Loose crystals may present a small parts hazard to young children, particularly children under three years old. If a crystal comes loose, depending on the size of the crystal, children may choke on, inhale, swallow, or insert the crystal into their noses.

Warning for Tableware

Application of loose crystals to tableware presents a potential risk of aspiration, choking, swallowing, or tooth damage should crystals become loose. To reduce this risk, crystals should never be applied to any surface of tableware likely to come in contact with food or the mouth, and crystals should never be placed on any tableware intended for use by children. Tableware with crystals intended for decorative use only should be marked as such. To avoid dishwasher damage, tableware decorated with crystals should be washed by hand. The application techniques or suggestions in this manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets relevant requirements related to small parts hazards or use in food contact items and assess any risk it may pose to users.

The use of crystals (which may contain restricted substances deemed hazardous under local laws) and adhesives on tableware is subject to legal restrictions in specific countries. The customer is fully responsible to comply with these country-specific provisions and shall defend, indemnify, and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products and waives all its own claims against Swarovski.

Notice for Application on Packaging

The use of crystal that may contain substances like lead, cadmium or hexavalent chromium, on packaging is subject to legal restrictions in specific countries, including but not limited in regard to the total content of substances based on the proportion between crystal mass to the remaining weight of packaging. The customer is fully responsible to comply with these country-specific provisions and to pass on this information to his customers.

VALID FROM FEBRUARY 2016

Sys.No. 5208930

Content is subject to change without notice.

Errors and misprints excepted.

Please note, the actual products may deviate from the pictures in color and effect.

Care Instructions

Failure to follow Swarovski's care instruction may result in damage to the Swarovski product, which could pose a risk of laceration or other harm. Please be informed that all conventional laundering processes (household washing machine as well as professional dry-cleaning) have a considerable mechanical influence onto the garment, which is based on the rotation of the washing drum. The essential requirement for a safety laundering process is that the Swarovski products are proper applied without restrictions regarding the adherence of the Swarovski products. The bigger the size of the used Swarovski product is and the more Swarovski products are applied next to each other, the more a risk of damage has to be taken into consideration. Swarovski products are made of or incorporate crystal and therefore must be handled with due care! Generally, to best protect the Swarovski products from breaking we recommend the use of a soft washing bag and to fill up the washing drum. Turning inside out before washing and selection of a gentle washing program, plus the use of mild detergents are important prerequisites to safeguard the quality of our Swarovski products. Our care instructions based on DIN EN ISO 3758 list up all Swarovski product groups as overview so that each used Swarovski product still needs to be judged in terms of its cleaning suitability for the intended purpose and finished product by the customer. Swarovski's recommendations are given according to the current state of our knowledge and Swarovski's determination of the qualification as textile application product. The customer is therefore fully responsible to determine the cleaning process applicable to the finished product, taking the Swarovski care instructions as well as those of third party materials into account. The variety of shape, cut, surface effect, size and application weight respectively amount of used Swarovski products are decisive for the determination of the suitable cleaning process. To be entirely safe customers respectively dry-cleaners usually take off Sew-on Stones, Buttons, etc. of bigger size before cleaning and re-apply them afterwards.

Unsuitable Applications

Crystals from Swarovski are intended for use in the fields of fashion, jewelry, accessories, textile products, and for interior décor. Due to their physical properties, crystals from Swarovski are unsuitable for other uses (e.g. gluing onto teeth, using crystals on or near mucous membranes, and other unsafe uses). The customer shall defend, indemnify and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products purchased by the customer, and waives all its own claims.

Responsibility of User

Any oral, written, or test-based advice that Swarovski provides regarding techniques for application of its products are recommendations based on Swarovski's current knowledge and the information provided by its suppliers. Such advice does not discharge the customer from carrying out its own tests of techniques it proposes to use and their suitability for the intended application. The application, use, and processing of these techniques and products are solely the user's responsibility.
