

SWAROVSKI

KAPUTT DESIGNED BY

Jean Paul
GAULTIER

NEW FOR FALL/WINTER 2016/17

**I ALWAYS FIND
BEAUTY IN
THINGS THAT
ARE ODD!
IMPERFECT
THEY ARE
MUCH MORE
INTERESTING.**

Jean Paul
GAULTIER

It all began with something perfect ...

When Jean Paul Gaultier, haute couture rebel and modern design legend, visited Swarovski headquarters in 2013, he was struck by the perfection of Swarovski crystal. Inspired to create a crystal design of his own, he felt that there was no way to make something perfect more perfect. There was only a way to make it new. And that was adding a touch of imperfection ...

KAPUTT PRODUCT FAMILY

DESIGNED BY JEAN PAUL GAULTIER

Once the idea was out there, the creative power of Jean Paul Gaultier and technical expertise of Swarovski joined forces to give birth to something new. It took them over a year of development and experimentation, but in the end the result was perfect. Or perfectly imperfect.

Aptly named "Kaputt" (the German word for "broken") this exciting new collection consists of two Pendants and three Fancy Stones in rich, shimmering metallic colors that riff on irregular forms, break with conventions and celebrate the appeal of being different and unpredictable.

A stroke of genius: Cut, color, facets, and even small details were defined, shaped, and approved by Jean Paul Gaultier himself.

DESIGNED BY

GAULTIER

CRYSTAL SCARABAEUS GREEN

DESIGNED BY JEAN PAUL GAULTIER

Scintillating somewhere between the hypnotic, otherworldly shimmer of the scarab and the bright green of tarnished copper, Crystal Scarabaeus Green was developed as a perfect match for the Kaputt Collection. It, too, was a flash of inspiration from Jean Paul Gaultier, who closely followed the development of this stunning new effect with its green, blue and purple metallic luster.

The story goes that as a young man Jean Paul Gaultier frequently went past the opera house in Paris and was fascinated by the green coloring of the tarnished copper roof.

EXCELLENCE, THROUGH INNOVATION AND ORIGIN

X-CUT
Advanced optical measurement and high-precision manufacturing deliver premium cuts characterized by unmatched brilliance.

HOTFIX GLUE
The variable temperatures at which Hotfix glue can be activated enable the application of crystals on a broad range of textiles.

PLATINUM PRO
With its new advanced foiling technique, Swarovski has set a new standard in the lifespan of crystals.

CRYSTALS - MADE IN AUSTRIA
The combination of innovation with sustainability and respect for individual wellbeing means that quality is always assured.

PREMIUM, BY SERVICE AND DESIGN

DESIGN SERVICE
Throughout its global network of Design Centers, Swarovski offers exceptional service provided by the industry's best creative talent.

GLOBAL SERVICE
Swarovski's Global Service Network provides customers with dedicated personal assistance on a local level.

APPLICATION SERVICE
A comprehensive range of application services means customers benefit from the extensive experience of leading international experts, as well as internal specialists.

DESIGNER EDITIONS
Creative collaborations with top designers result in exclusive cuts and unique designs for Swarovski crystal.

COMPLIANCE, WITH INTEGRITY

ADVANCED CRYSTAL
Swarovski's patented lead-free* formula has changed the DNA of crystal while still offering the same sparkle, dependability, and variety for which Swarovski is famous.

CLEAR
Regular legal monitoring of chemical requirements and reasonable testing provide customers with the comfort of trust in Swarovski's products.

*Crystal glass and all other materials containing 0.009% lead or less.

OEKO-TEX
Oeko-Tex® Standard 100 Class II (direct contact with skin) certification creates confidence in chemical safety of textile applications.

Please note that matt surfaces show a particular aging process which add an additional embellishment to the Kaputt stones. Generally matte surfaces become greasy and fingerprints appear easily. Clean gently with washing-up liquid or Isopropanol using a microfiber cloth. Please take care not to rub the surface when cleaning.

KAPUTT DESIGNED BY JEAN PAUL GAULTIER

Design Story: While the whole world strives for perfection, Swarovski discovers the beauty of imperfection, guided and inspired by none other than design legend Jean Paul Gaultier. Together with Swarovski’s own trend, design and product management experts, Gaultier developed the spectacular Kaputt Collection exclusively for Swarovski. Like its name, the German word for “broken,” already suggests, the collection presents a technological innovation that deliberately breaks with convention. It celebrates the appeal of being different and unpredictable, which, according to the designer, is much more exciting than the precise and perfect.

Description: Broken and raw, but elegant at the same time, the Kaputt design captivates with distinctively irregular, partly unpolished, or frosted surfaces that give it an all natural, almost meteoritic appearance. It comes in rich, shimmering metallic colors as well as classics, such as Crystal and GSHA, and boasts the famous Jean Paul Gaultier logo as a laser engraving.

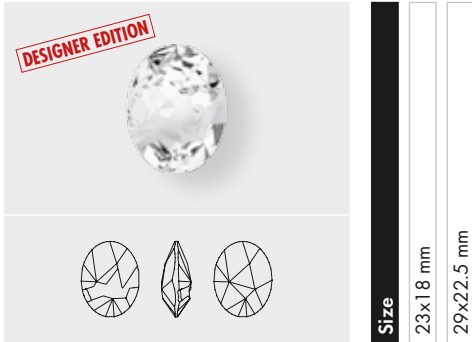

Look: In a world of flawless, artificial beauty, Kaputt mirrors the attractiveness of irregular, natural surfaces for a down-to-earth look that is both rock and chic.

CRYSTAL SCARABAEUS GREEN DESIGNED BY JEAN PAUL GAULTIER

Design Story: Expressing his desire for an exclusive effect that would match his Kaputt Collection, haute couture icon Jean Paul Gaultier developed Crystal Scarabaeus Green together with a team of experts from Swarovski. For his effect he wanted this precise scintillating shade of green, combined with the mythological shimmer of the Egyptian scarab.

Description: Aptly named, Crystal Scarabaeus Green evokes the magic glow of the scarab, shimmering in green, blue, and purple with a metallic luster that combines bright and shadowy facets to create a stunningly graphic surface.

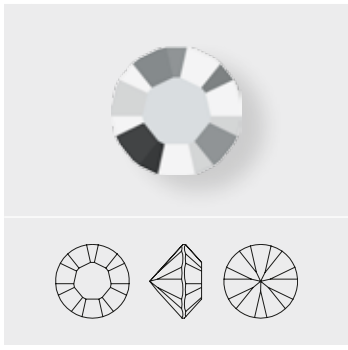

Look: With its beetle-like glow, Crystal Scarabaeus Green lends itself perfectly to nature-inspired and bold eco-designs. It powerfully mimics nature and sets a rebellious statement for any eco-warrior. However, its shiny surface also evokes an otherworldly appearance that echoes futuristic, stellar avant-garde looks. The metallic rainbow hue caters to the sporty sci-fi appeal that celebrates state-of-the-art technology and transports us into other dimensions.

* For details about the "protective layer" please refer to the chapter 'Basic Information' in the Swarovski Crystal Collection 2014.

Round Stones

Round Stones are loose crystal elements, most of which are pointed on the reverse side for easy application. The assortment features a wide variety of different cuts, the most innovative one is the gemstone-like XIRIUS Chaton.

CARE INSTRUCTIONS

|  |  |  |  |  |  |
|---|---|---|---|---|---|
| Turn inside out, choose a gentle wash cycle and use mild laundry detergent. | Do not use chlorine bleach! | Do not tumble dry! | Iron inside out using a silk/ polyester/ viscose setting. | The textile can be gently dry-cleaned using hydrocarbon. Turn inside out. | The textile will withstand gentle professional wet cleaning. Turn inside out. |
| To protect the crystals as much as possible, the use of a soft wash bag is recommended. | | | Please be advised that ironing too long may reactivate the adhesive. It is recommended to turn the textile inside out and use a pressing cloth. | | |

* Color tones according to the RAL colors.

Synthetics Hotfix such as Crystal Rocks and Crystal Fine Rocks, Crystal Fabric, and Crystaltex combine elegant crystals from Swarovski with synthetic carrier materials that can be applied using Hotfix technology. They are ideal for use in the textile, interior design, jewelry, and accessories segments.

GRAPHIC FABRIC, FINE ROCKS & ROCKS

Taking the word “image” from “imagination” and leading it to new creative heights, Swarovski presents a new graphic technology that opens up a world of design possibilities – in an unprecedented richness of detail!

The new product group Graphic allows for the printing of individual motifs – such as pictures, graphics, logos or letterings – onto the customer favorites Crystal Fabric, Crystal Rocks and Crystal Fine Rocks.

The two different printing methods, either on or below the crystal, or a combination of both enrich your personal motif with a sparkling 3D surface for stunning effects in a series of application fields.

As a true highlight and stunning innovation in our assortment, the Graphic Fabric, Fine Rocks & Rocks speak to the rising demand for personalized design items. It highlights our desire for an individual look in a world of mass production.

GRAPHIC OFFERS DIFFERENT PRINTING METHODS:

Foil Print (FP)

The motif is being printed on the foil below the crystal, which means...

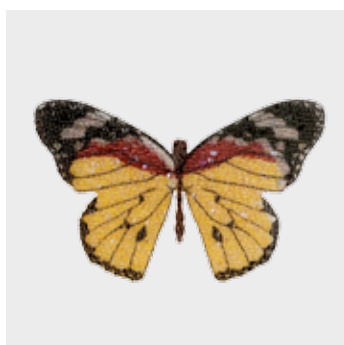

- The brilliance of the crystal remains
- Blurred contours can be used as a design element, e.g. for mille fleurs motifs

Glass Print (GP)

The motif is being printed on crystal, which means...

- Highly precise reproduction of the motif, even of tiny details and small fonts
- No blurring occurs
- Matte effect can be used as a design element

Combination of Foil & Glass Print (FP&GP)

- Spectacular depth effects
- Highlighting special features of the design

SPECIAL MOTIF SERVICE

A special motif is a design created by the customer which is different from the Graphic Fabric, Fine Rocks & Rocks Standard Collection. This service opens up many customization possibilities and enables you to benefit from Swarovski's longstanding experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below).

You may also submit sketches of a design to suit your personal requirements – such as a brand image or an image that complements a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which allows for easy adjustments tailored to your needs.

Required information for Graphic Fabric, Fine Rocks & Rocks

| | |
|--------------------------------------|----------------------------------|
| data format contour/outline | vector graphics (.dxf, .ai) |
| data format picture | raster graphic (.png) |
| picture resolution & size | min. 300dpi (full-scale picture) |
| colors | rgb |
| fonts | convert into paths |
| embedded pixel pictures | vector graphics required |

Due to the different print methods (foil or glas print) the colors will vary.

If detailed information and possible print tolerances (offset, color tolerance...) is needed, please contact Swarovski and an application request will be placed in our application database.

CUSTOMIZATION POSSIBILITIES FOR GRAPHIC FABRIC, FINE ROCKS & ROCKS

| | GRAPHIC FABRIC | GRAPHIC FINE ROCKS | GRAPHIC ROCKS |
|--|---|--|--|
| Max. motif size | 400x330 mm | 400x330 mm | 400x330 mm |
| Min. motif size | 10x10 mm (or effective surface of 1.0 cm ²) | 15x15 mm (or effective surface of 2.25 cm ²) | 15x15 mm (or effective surface of 2.25 cm ²) |
| Min. width of holes within motifs | 3 mm | 3 mm | 3 mm |
| Min. product surface | 3 mm | 4 mm | 9 mm |
| Min. size of the smallest element within a motif | 10x10 mm (or effective surface of 1.0cm ²) | 15x15 mm (or effective surface of 2.25 cm ²) | 15x15 mm (or effective surface of 2.25 cm ²) |

Due to production issues, motifs with edges and angles of less than 90° need to be rounded off.

ORDERING PROCESS

Send the request with a drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif relates to (Graphic Fabric, Fine Rocks & Rocks).

You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made.

Your special motif will be produced and delivered following your confirmation.

IMPORTANT INFORMATION

Please always submit your drawing of the desired motif in the actual size you require. When enlarged to the desired size, a small sketch will have blurred lines that will make it difficult to correctly reinterpret. Full-scale pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via e-mail or on a CD-ROM. If sending a sewing pattern, please include the whole pattern and not just cut outs. If the sketch is submitted as a hard copy by fax or e-mail, please include a scale legend (e.g. copy/scan with ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

Due to the tolerance level of the crystals being applied onto carrier film, the final Graphic Fabric, Fine Rocks & Rocks motifs may slightly differ from the sketches or prints in relation to the motifs' outline. Therefore the product may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims are excluded and Swarovski assumes no liability whatsoever in connection with them.

If detailed information on possible tolerances is needed (e.g. cavity production for a metal part) and print tolerances (offset, color tolerance...) please contact Swarovski and an application request will be placed in our application database.

If considered feasible, special productions are generally offered to all our customers. Please note: special productions are subject to acceptance by Swarovski and the order of a design does not automatically grant exclusive production of this design for the customer.

For detailed application information, please refer to the Application Manual and our business website SWAROVSKI.COM/PROFESSIONAL or contact your Swarovski sales office.

APPLICATION ADVICE

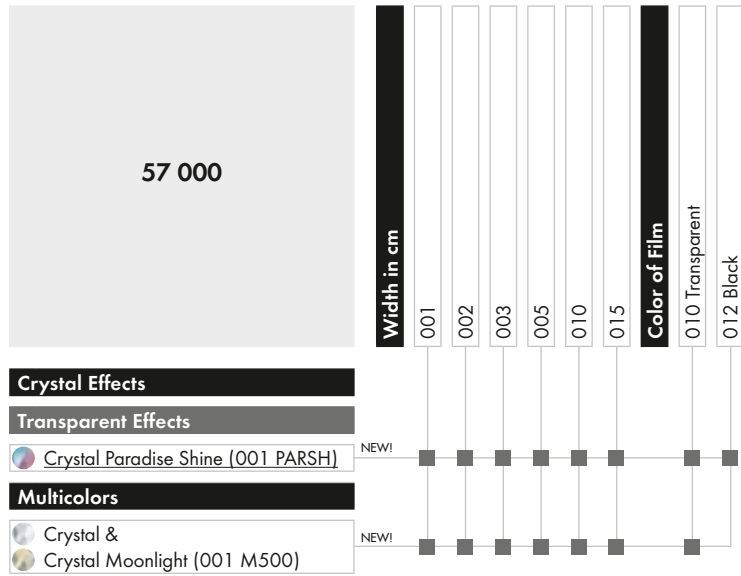

Graphic Fabric/ Fine Rocks/ Rocks can be easily applied using a standard heat press. The application parameters are the same as those that apply to Crystal Fabric/ Fine Rocks/ Rocks. For detailed information, please refer to the Application Manual and our business website SWAROVSKI.COM/PROFESSIONAL.

CARE INSTRUCTIONS

For detailed information, please refer to the Application Manual and our business website SWAROVSKI.COM/PROFESSIONAL.

|  |  |  |  |  |  |
|---|---|---|---|---|---|
| Turn inside out, choose a gentle wash cycle and use mild laundry detergent. | Do not use chlorine bleach! | Do not tumble dry! | Iron inside out using a silk/polyester/viscose setting. | The textile can be gently dry-cleaned using hydrocarbon. Turn inside out. | The textile will withstand gentle professional wet cleaning. Turn inside out. |
| To protect the crystals as much as possible, the use of a soft wash bag is recommended. | | | Ironing the textile inside out and using a pressing cloth is recommended. | | |

Crystal Buttons offer a huge assortment that includes Crystal Buttons, Buttons with Plastic Shanks, Decorative and Jeans Buttons, as well as Snap Fasteners in a variety of sizes, colors, and effects. With the crystals being integrated into the zipper teeth, zippers from our assortment make for glamorous attires.

3008 Classic Crystal Button (4 holes) ^{NEW!}

APPLICATION ADVICE

The Classic Crystal Button (4holes) can be applied by hand or using a domestic or industrial sewing machine. When sewing this button, synthetic multifilament threads with a thread count of Nm 80 are most suitable due to their abrasion resistance. Monofilament and pure cotton yarns are not recommended due to their limited abrasion resistance.

Please make sure that the transport system is deactivated to avoid any movement of the fabric. After selecting the over edge stitch, the length and width of the stitch must be adjusted to suit the element being applied. Due to the height of the article, using a program for sewing on buttons is not possible and it can only be applied without a standard presser foot.

CARE INSTRUCTIONS

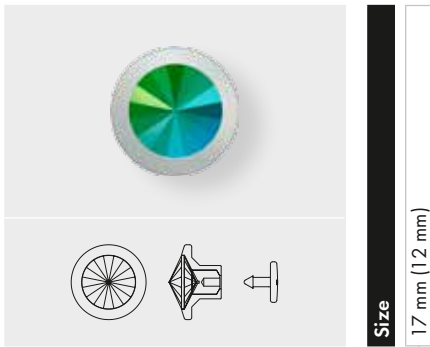

The care instructions for the Classic Crystal Button (4holes) are the same as those that apply to the Crystal Button assortment. For detailed information, please refer to the Application Manual on our business website SWAROVSKI.COM/PROFESSIONAL.

CERALUN LINE EXTENSION IN COLOR ASSORTMENT

An absolutely essential material for innovative design has entered a new, colorful age: Ceralun™, the versatile compound for creating artistic pavés, is now available in more colors.

ARTICLE EXPLANATION

Ceralun™ is a versatile and strong two-component, high-performance ceramic epoxy composite. The clay has been specifically developed and tailored to embed foiled and unfoiled crystals. It is an absolutely essential material for innovative design. It will give you new designing possibilities and is a perfect match for the new effects Crystal Scarabaeus Green and Crystal Light Chrome.

Ceralun has a high level of hardness, rigidity, and shock absorbance. It is resistant to perspiration, humidity, or climatic changes and shows no aging.

ORDERING EXAMPLE

9030/400 CERALUN DARK SAPPHIRE 100G EUR

OVERVIEW OF ALL AVAILABLE COLORS AND EFFECTS

| 9030/XXX | 5x20 g | 100 g | 10x100 g | 1 kg Box |
|----------------|--------|-------|----------|----------|
| Dark Sapphire | ✓ | ✓ | ✓ | ✓ |
| Malachite | ✓ | ✓ | ✓ | ✓ |
| Red | ✓ | ✓ | ✓ | ✓ |
| Yellow | ✓ | ✓ | ✓ | ✓ |
| Shinning Green | ✓ | ✓ | ✓ | ✓ |
| Anthracite | ✓ | ✓ | ✓ | ✓ |

APPLICATION ADVICE

When working with Ceralun™, optimal results are obtained by coordinating the entire application process. Following the application steps in the right order is very important. Experience has shown that the most common reasons for crystals becoming detached are inappropriate areas of application, the wrong mixing ratio of the two components, or not mixing them together long enough until a homogenous appearance is achieved. For detailed application process please find more information on our business website SWAROVSKI.COM/PROFESSIONAL

LINE EXTENSION CG-500 CARTRIDGE MIXER

This spare part for the two-component glue CG-500 cartridge (Article Number 9030/125 Europe, 9030/225 America, 9030/325 Asia) will greatly improve application results because in order to press the glue out of the cartridge, the glue has to be mixed optimally.

ORDERING EXAMPLE

9030/126 CG500 mixing nozzle (Cart.2x25g) 10qty

General Warning

Loose crystals may present a small parts hazard to young children, particularly children under three years old. Depending on the size of the crystal and any attached material (such as glue, fabric, etc.), children may choke on, inhale, swallow, or insert the crystal into their noses. Magnetic products with crystal applications pose a particular risk of serious intestinal injury if ingested. The application techniques as stated in the Application Manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets the relevant requirements related to small parts hazards and assess any risk it may pose to small children. Failure to follow Swarovski's care instructions may result in damage to the crystal, which could pose a risk of laceration or other harm.

Warning for Crystal Tattoos

Crystal Tattoos may be applied on healthy skin only. Do not adhere to eyes or on mucous membranes. Crystal Tattoos are not recommended for young children. Loose crystals may present a small parts hazard to young children, particularly children under three years old. If a crystal comes loose, depending on the size of the crystal, children may choke on, inhale, swallow, or insert the crystal into their noses.

Warning for Tableware

Application of loose crystals to tableware presents a potential risk of aspiration, choking, swallowing, or tooth damage should crystals become loose. To reduce this risk, crystals should never be applied to any surface of tableware likely to come in contact with food or the mouth, and crystals should never be placed on any tableware intended for use by children.

Tableware with crystals intended for decorative use only should be marked as such. To avoid dishwasher damage, tableware decorated with crystals should be washed by hand. The application techniques or suggestions in this manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets relevant requirements related to small parts hazards or use in food contact items and assess any risk it may pose to users.

The use of crystals (which may contain restricted substances deemed hazardous under local laws) and adhesives on tableware is subject to legal restrictions in specific countries. The customer is fully responsible to comply with these country-specific provisions and shall defend, indemnify, and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products and waives all its own claims against Swarovski.

Notice for Application on Packaging

The use of crystal that may contain substances like lead, cadmium or hexavalent chromium, on packaging is subject to legal restrictions in specific countries, including but not limited in regard to the total content of substances based on the proportion between crystal mass to the remaining weight of packaging. The customer is fully responsible to comply with these country-specific provisions and to pass on this information to his customers.

Care Instructions

Failure to follow Swarovski's care instruction may result in damage to the Swarovski product, which could pose a risk of laceration or other harm. Please be informed that all conventional laundering processes (household washing machine as well as professional dry-cleaning) have a considerable mechanical influence onto the garment, which is based on the rotation of the washing drum. The essential requirement for a safety laundering process is that the Swarovski products are properly applied without restrictions regarding the adherence of the Swarovski products. The bigger the size of the used Swarovski product is and the more Swarovski products are applied next to each other, the more a risk of damage has to be taken into consideration. Swarovski products are made of or incorporate crystal and therefore must be handled with due care! Generally, to best protect the Swarovski products from breaking we recommend the use of a soft washing bag and to fill up the washing drum. Turning inside out before washing and selection of a gentle washing program, plus the use of mild detergents are important prerequisites to safeguard the quality of our Swarovski products. Our care instructions based on DIN EN ISO 3758 list up all Swarovski product groups as overview so that each used Swarovski product still needs to be judged in terms of its cleaning suitability for the intended purpose and finished product by the customer. Swarovski's recommendations are given according to the current state of our knowledge and Swarovski's determination of the qualification as textile application product. The customer is therefore fully responsible to determine the cleaning process applicable to the finished product, taking the Swarovski care instructions as well as those of third party materials into account. The variety of shape, cut, surface effect, size and application weight respectively amount of used Swarovski products are decisive for the determination of the suitable cleaning process. To be entirely safe customers respectively dry-cleaners usually take off Sew-on Stones, Buttons, etc. of bigger size before cleaning and re-apply them afterwards.

Unsuitable Applications

Crystals from Swarovski are intended for use in the fields of fashion, jewelry, accessories, textile products, and for interior décor. Due to their physical properties, crystals from Swarovski are unsuitable for other uses (e.g. gluing onto teeth, using crystals on or near mucous membranes, and other unsafe uses). The customer shall defend, indemnify and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products purchased by the customer, and waives all its own claims.

Responsibility of User

Any oral, written, or test-based advice that Swarovski provides regarding techniques for application of its products are recommendations based on Swarovski's current knowledge and the information provided by its suppliers. Such advice does not discharge the customer from carrying out its own tests of techniques it proposes to use and their suitability for the intended application. The application, use, and processing of these techniques and products are solely the user's responsibility.
